Highlighting the major economic and industrial changes in the lubrication industry since the first edition, Synthetics, Mineral Oils, and Bio-Based Lubricants, Second Edition outlines the state of the art in each major lubricant application area. Chapters cover trends in the major industries, such as the use of lubricant fluids, growth or decline of market areas and applications, potential new applications, production capacities, and regulatory issues, including biodegradability, toxicity, and food production equipment lubrication. In a single, unique volume, Synthetics, Mineral Oils, and Bio-Based Lubricants, Second Edition offers property and performance information of fluids, theoretical and practical background to their current applications, and strong indicators for global market trends that will influence the industry for years to come.

After the Three Italies develops a new political economy approach to the analysis of comparative regional development and the territorial division of labour and exemplifies it through an up-to-date account of Italian industrial change and regional economic performance. Responds to recent theoretical debates in economic geography, involving economists, geographers and planners. Builds the foundations for a new theoretical approach to regional economic development and the territorial division of labour. Draws on the results of a recent ESRC funded research project, as well as on a large range of official data sets. Provides an up-to-date picture of Italy ‘ s economic performance and of its recent development relative to other European countries and the rest of the world. Analyses Italy's internal differentiation and its persistent regional inequalities. Examines the regional impact of the recent evolution of the car, chemicals, steel and clothing industries. Leads to a new and more complex picture of Italian development.

Building on a wealth of research, The Automotive Industry and the Environment addresses current challenges in the automotive industry and how they can be met. The authors discuss the development of the automotive industry and the problems it currently faces and consider possible solutions. The book reviews trends in more environmental-friendly technologies, such as the use of more sustainable fuel sources and new types of modular designs with built-in recyclability. The book also describes new models of decentralized production, particularly the micro factory retailing (MFR) model, that provide an alternative to volume production and promise to be both more sustainable and more profitable.

The automotive industry is a major pillar of the modern global economy and one of Europe ’ s key industries. There can hardly be any doubt about the important role of this sector as an engine for employment, growth and innovation in Europe, and there are crucial challenges and opportunities ahead. The authors shed light on a broad range of issues – globalisation and restructuring, trade and foreign direct investment, innovation, regulation, and industry policy – and put a special focus on the new member states. While change may be inevitable, progress is not. This book shall serve as a map to all stakeholders: business executives and policy makers, investors and scholars.

Why do some companies succeed better than others? It is well known that there are many variables such which may impact a company's performance. The authors present their new model for Market Proactiveness which shows organizations how to anticipate change and respond to it before they are forced to do so, and improve their overall performance.

Henry Foster has always loved exploring the Amazon. But he didn't count on exploring something far more deadly. A grave mistake has caused Henry to lose his career as a promising scientist dedicated to studying the Amazon rainforest. Yet he's landed an assistant job at a remote research station that lets him continue there in relative peace. That is, until he's assigned to lead a documentary film crew to an abandoned mine, presumably long lost to the jungle. Upon their arrival, Henry makes an unfortunate discovery. Although the crew is detained by armed soldiers, Henry narrowly escapes with Clare Andersen, an adventurous Australian TV host. But when they make it out of the jungle and into the nearest city, they learn they're wanted for murder. Running from both the police and vicious thugs, Henry and Clare set out in a race against time to prove their innocence and save the missing filmmakers, uncovering clues to a dangerous international conspiracy set in the heart of the Amazon rainforest.
