This open access book constitutes the proceedings of the 23rd International Conference on Foundations of Software Science and Computational Structures, FOSSACS 2020, which took place in Dublin, Ireland, in April 2020, and was held as Part of the European Joint Conferences on Theory and Practice of Software, ETAPS 2020. The 31 regular papers presented in this volume were carefully reviewed and selected from 98 submissions. The papers cover topics such as categorical models and logics; language theory, automata, and games; modal, spatial, and temporal logics; type theory and proof theory; concurrency theory and process calculi; rewriting theory; semantics of programming languages; program analysis, correctness, transformation, and verification; logics of programming; software specification and refinement; models of concurrent, reactive, stochastic, distributed, hybrid, and mobile systems; emerging models of computation; logical aspects of computational complexity; models of software security; and logical foundations of data bases.

[May 11-13, 2017 Amsterdam, Nehterlands Key Topics : Elementary concepts of organic chemistry, Organometallic compounds, Bioorganic chemistry, Carbohydrates and phenols, Stereochemistry, Analytical techniques in organic chemistry, Carboxylic acids and its derivatives, Chemical bonding, Cheminformatics, Green and environmental chemistry, Polymers and monomers, Bio-chemistry and agricultural chemistry, Catalysis of organic reactions, Physical organic chemistry, Natural product chemistry,](#)

[May 15-16, 2017 Munich, Germany Key Topics : Current Challenges of Biologics, Emerging Biosimilars in Therapeutics, Analytical Strategies for Biosimilars, Regulatory Approach and Legal Issues of Biosimilars, Innovative Approach for Biosimilars, Consequences of Brexit on Biosimilars, Globalization of Biosimilars, Clinical Development of Biosimilars, Biosimilar Market and Cost Analysis, Pharmacovigilance on Biosimilars, Entrepreneurs Investment Meet,](#)

Exam board: Pearson Edexcel; OCR Level: AS/A-level Subject: History First teaching: September 2015 First exams: Summer 2016 (AS); Summer 2017 (A-level) Put your trust in the textbook series that has given thousands of A-level History students deeper knowledge and better grades for over 30 years. Updated to meet the demands of today's A-level specifications, this new generation of Access to History titles includes accurate exam guidance based on examiners' reports, free online activity worksheets and contextual information that underpins students' understanding of the period. - Develop strong historical knowledge: in-depth analysis of each topic is both authoritative and accessible - Build historical skills and understanding: downloadable activity worksheets can be used independently by students or edited by teachers for classwork and homework - Learn, remember and connect important events and people: an introduction to the period, summary diagrams, timelines and links to additional online resources support lessons, revision and coursework - Achieve exam success: practical advice matched to the requirements of your A-level specification incorporates the lessons learnt from previous exams - Engage with sources, interpretations and the latest historical research: students will evaluate a rich collection of visual and written materials, plus key debates that examine the views of different historians

[February 27-28, 2017 Amsterdam, Netherlands Key Topics : Identification and characterization of Mycotoxins, Co-occurrence and Co-exposure, Disease and Mycotoxins monitoring, Detoxification/Degradation, Impact on Human Health and animal health, Toxicology, Carcinogenic myco-toxins and Epidemiology, Food contamination and control methodologies, Genetic-bio molecular controls of biosynthesis, Entrepreneur Investments Meet: Description, Mycotoxins in Agriculture and Food Safety, Mycotoxins and Phycotoxins, Applied Mycology, Chemistry of Mycotoxins, Mycotoxins Metabolites in Human and Animals, Chromatography of Mycotoxins, Mycotoxins in grain, Environmental Mycology, Mycotoxic Fungi, Food and Nutrition Toxicology, Food Borne Diseases, Fungal Allergy and Pathogenicity, Fungal Biotechnology,](#)

This Palgrave Pivot presents tournament design mainly within the axioms of incentive compatibility and fairness. It illustrates the advantages of an axiomatic approach through various examples, including several FIFA and UEFA tournaments, and uses theoretical tools and simulation methodology in its analysis. Chapter 1 discusses scoring systems of championships with multiple competitions, ranking in Swiss-system tournaments, and tie-breaking rules in round-robin leagues. It is followed by a thorough critical analysis of the current and previous FIFA World Rankings. The broad focus is substantially narrowed in Chapter 2, which turns to the topic of incentive (in)compatibility in multiple qualifiers. It is revealed that UEFA has faced at least three times recently this problem in the qualification to the UEFA Europa League, qualification to the UEFA Champions League, and the draw of the UEFA Champions League groups. Analogously, Chapter 3 discusses incentive (in)compatibility when there is only one group-based tournament but the complex progression rules to the subsequent stage can be designed poorly. Our examples include the qualifying tournaments of recent FIFA World Cups and UEFA European Championships. Chapter 4 moves to the problem of penalty shootout rules in soccer, where the fairness and complexity of some alternative mechanisms from the literature are evaluated. Fairness remains the central issue in Chapter 5, which presents the challenges of designing a tournament with 24 teams if the number of teams per group cannot exceed four. As expected, there is no perfect solution, and both FIFA and UEFA have introduced a reform in this format recently. Chapter 6 deals with the qualification for the 2020 UEFA European Football Championship. Its tournament design is perhaps the most complicated one that has ever been implemented in the real-world and suffers from serious shortcomings.

[March 30-31, 2017 Madrid, Spain Key Topics : Aquatic Ecosystem and Aqua Farming Method, Targets and Tools for Selective Breeding of Aquaculture Species, Biosecurity in Aquaculture, Aquaculture Waste Management, Climate Effects on Fish Physiology and Growth, Aquaculture Disease, Diagnostic and Health Management, Aquaculture Business Law, Ethics and Policy, Communication and Fish Behaviour, Phytobiotics in Aquaculture, Hydroponics: Present and Future, Biochemistry of Marine Animals, Food Safety in Aquaculture, Mycotoxins in Aquaculture, Aquatic Immunology, Aquaculture in Australia, Aquaculture in Canada, Aquaculture in China, Aquaculture in USA, Aquaculture in Europe, Aquaculture in Asia, Fisheries in Europe, Fisheries in Asia, Fisheries in USA, Fisheries in Canada, Fisheries in China, Fisheries in Australia,](#)
