A Brief Description of the Com□. The Lafayette Common Course of
Study (CCS) was revised by the faculty in 2012 to create an all
inclusive core. In addition, it is our first outcomes-based curriculum
and so includes goals that will be assessed on a continuing basis.
The result is an organic general education program that will evolve
and change as we review how well we are accomplishing what we
aspire to teach our students.

A brief Course on Apologetics ... But why, do you think, is it
important to study apologetics? There are several reasons why we
need to learn and practice apologetics. 1. The first and most obvious
is because the Word of God commands us to be ready to defend the
faith (recall 1. Peter 3:15).

A brief Course on Apologetics - Cornell University

How will we study this in this course. ... Consider just a few brief examples. The Bible foretells the destruction of the city of Tyre with miraculous precision. Ezekiel predicted that Nebuchadnezzar, king of Babylon, would destroy the city (Ezekiel 26:7-8). Many nations were to come up against Tyre (26:3).

If you are offering a course that will be publicized through a catalog or brochure, you or the course sponsor will need to write a course description. The course description is vital to getting people to enroll in your course. A good course description can mean many enrollments while a poor course description can doom your course before it starts.

disease and that complex conditions of the human body can be cured only by complex mixtures of the active principles of various plants. The organon to the new world of electro-homoeopathy introduces the very basic concepts behind its evolution along with life histories of noted electro-homoeopaths, comparison of electro-homoeopathic and homoeopathy modes of treatment, aims and objectives, advantages, underlying laws and principles, essay on Matteis remedies with their administration and effects and antidotes. The book redefines the modern concept of health and disease, the duties of the physician, and the correct approach to case taking along with a concluding chapter on classification of diseases.

This book contains a brief course in elementary linear algebra with emphasis on solving systems of linear algebraic and ordinary differential equations. It is written for undergraduate students in the disciplines of applied mathematics, science and engineering. Topics covered include basics of matrices and vectors, systems of linear algebraic equations, matrix inverse, matrix determinant, eigenvalues and eigenvectors, matrix diagonalization, and systems of first order linear ordinary differential equations. The connections between the topics are carefully elucidated. Derivations or proofs are given in detail for all the main results in the book. Basic knowledge of the arithmetic of complex numbers and exposure to elementary functions and calculus are assumed. Problems are set at the end of every main chapter of the book to test the understanding of students and to provide further insights into the topics studied.
