Discusses the history of the two Supreme Court cases that were responsible for changing the laws regarding the death penalty in America and polarizing the nation.

New York Times Book Review Editor's Choice Drawing on never-before-published original source detail, the epic story of two of the most consequential, and largely forgotten, moments in Supreme Court history. For two hundred years, the constitutionality of capital punishment had been axiomatic. But in 1962, Justice Arthur Goldberg and his clerk Alan Dershowitz dared to suggest otherwise, launching an underfunded band of civil rights attorneys on a quixotic crusade. In 1972, in a most unlikely victory, the Supreme Court struck down Georgia ' s death penalty law in *Furman v. Georgia*. Though the decision had sharply divided the justices, nearly everyone, including the justices themselves, believed *Furman* would mean the end of executions in America. Instead, states responded with a swift and decisive showing of support for capital punishment. As anxiety about crime rose and public approval of the Supreme Court declined, the stage was set in 1976 for *Gregg v. Georgia*, in which the Court dramatically reversed direction. *A Wild Justice* is an extraordinary behind-the-scenes look at the Court, the justices, and the political complexities of one of the most racially charged and morally vexing issues of our time.

*Wild Justice* by Joanna Mansell released on Sep 22, 1989 is available now for purchase.

Scientists have long counseled against interpreting animal behavior in terms of human emotions, warning that such anthropomorphizing limits our ability to understand animals as they really are. Yet what are we to make of a female gorilla in a German zoo who spent days mourning the death of her baby? Or a wild female elephant who cared for a younger one after she was injured by a rambunctious teenage male? Or a rat who refused to push a lever for food when he saw that doing so caused another rat to be shocked? Aren't these clear signs that animals have recognizable emotions and moral intelligence? With *Wild Justice* Marc Bekoff and Jessica Pierce unequivocally answer yes. Marrying years of behavioral and cognitive research with compelling and moving anecdotes, Bekoff and Pierce reveal that animals exhibit a broad repertoire of moral behaviors, including fairness, empathy, trust, and reciprocity. Underlying these behaviors is a complex and nuanced range of emotions, backed by a high degree of intelligence and surprising behavioral flexibility. Animals, in short, are incredibly adept social beings, relying on rules of conduct to navigate intricate social networks that are essential to their survival. Ultimately, Bekoff and Pierce draw the astonishing conclusion that there is no moral gap between humans and other species: morality is an evolved trait that we unquestionably share with other social mammals. Sure to be controversial, *Wild Justice* offers not just cutting-edge science, but a provocative call to rethink our relationship with—and our responsibilities toward—our fellow animals.

The true and gripping account of the nine-year struggle by a small band of lawyers to abolish the death penalty in the United States. Its new edition features a 2011 Foreword by death-penalty author Evan Mandery of CUNY's John Jay College of Criminal Justice, as well as a new Preface by the author. The mission, plotted out over lunch in New York's Central Park in the early 1960s, seemed as impossible as going to the moon: abolish capital punishment in every state. The approach would fight on multiple fronts, with multiple strategies. The people would be dedicated, bright, unsure, unpopular, and fascinating. This is their story: not only the cases and the arguments before courts, the death row inmates and their victims, the judges and politicians urging law and order, this is the true account of the real-life lawyers from the inside. The United States indeed went to the moon, and a few years later the U.S. Supreme Court ruled the death penalty unconstitutional. The victory was long-sought and sweet, and the pages of this book vividly let the reader live the struggle and the victory. And while the abolition eventually became as impermanent as the nation's presence on the moon, these dedicated attorneys certainly made a difference. This is their tale. As Evan Mandery writes in his new Foreword, "In these pages, Meltsner lays bare every aspect of his and his colleagues' thinking. You will read how they handicapped their chances, which arguments they thought would work (you may be surprised), and what they thought of the Supreme Court justices who would decide the crucial cases. You will come to understand what they perceived to be the basis for support for the death penalty, and, with Meltsner's unflinching honesty, what they perceived to be the inconsistencies in their position." Mandery concludes: "It is my odd lot in life to have read almost every major book ever written about the death penalty in America. This is the best and the most important. Every serious scholar who wants to advance an argument about capital punishment in the United States--whether it is abolitionist or in favor of the death penalty, or merely a tactical assessment--cites this book. It is open and supremely accessible." And the author's "constitutional vision was years ahead of its time. His book is timeless." Part of the Legal History and Biography Series from Quid Pro Books, the new ebook editions feature embedded pagination from previous editions (consistent with the new paperback edition as well, allowing continuity in all formats), active TOC and endnotes, and quality digital formatting.

democracy ' s hour of maximum danger. ” —Jon Meacham The gripping story of the year that transformed the Supreme Court into the court of Donald Trump and Amy Coney Barrett, from the Pulitzer Prize–winning law columnist for The New York Times At the end of the Supreme Court ' s 2019–20 term, the center was holding. The predictions that the court would move irrevocably to the far right hadn ' t come to pass, as the justices released surprisingly moderate opinions in cases involving abortion rights, LGBTQ rights, and how local governments could respond to the pandemic, all shepherded by Chief Justice John Roberts. By the end of the 2020–21 term, much about the nation ' s highest court has changed. The right-wing supermajority had completed its first term on the bench, cementing Donald Trump ' s legacy on American jurisprudence. This is the story of that term. From the death of Ruth Bader Ginsburg to the rise of Amy Coney Barrett, from the pandemic to the election, from the Trump campaign ' s legal challenges to the ongoing debate about the role of religion in American life, the Supreme Court has been at the center of many of the biggest events of the year. Throughout *Justice on the Brink*, legendary journalist Linda Greenhouse, who won a Pulitzer Prize for her Supreme Court coverage, gives us unique insight into a court under stress, providing the context and brilliant analysis readers of her work in *The New York Times* have come to expect. Ultimately, Greenhouse asks a fundamental question relevant to all Americans: Is this still John Roberts ' s Supreme Court, or does it now belong to Donald Trump?

Inside a cabin tucked away in the Oregon woods a grisly scene awaits investigating police. Jaffe's daughter, Amanda—a young lawyer getting her first taste of criminal defense—wonders whether she's representing an innocent man or using her considerable skills to set a monster free. Then Cardoni disappears under bizarre circumstances. Four years later the slaughter begins again. But is it Cardoni plying his gruesome trade, or the work of another equally brilliant, equally inspired killer? And can Amanda and policeman Bobby Vasquez hunt the elusive maniac down before they themselves fall victim to a psychopath's terrible hunger?
