~~How Do You
Multiply
Binomials Using
FOIL? | Virtual
Nerd~~

The first method
for factoring

Acces PDF

Algebra 1

polynomials will be factoring out the greatest common factor.

When factoring in general this will also be the first thing that we should try as it will often simplify the problem. To use this method all that we do is

Acces PDF

Algebra 1

Factor at all the terms and determine if there is a factor that is in common to all the terms. If there is, we will factor it out of the polynomial.

~~Algebra~~
