big-ideas-math.weebly.com - HAPPINESS GAMES

When planning for math, whether it is long range planning, unit planning or lesson plans its important to focus on the "Big Ideas". The "Big Ideas" are an overview of the specific expectations for each strand and they encompass key practices such as: Problem Solving; Communication; Student Talk; Use of Manipulatives; Home Connections; Some of the "Big Ideas" in math are: Quantity; Operational sense; Relationships; Representation; Proportional reasoning

Big Ideas - Blog

However, a simple way to reduce anxiety and provide you with a clear focus for your math programming can come when you look at the Big Ideas. According to A Guide to Effective Instruction in Mathematics, Kindergarten to Grade 3 : Number Sense and Numeration (2003), children are more capable of learning and understanding mathematics when teachers organize lessons/units around big coherent chunks (p. viii).
