imaginary creatures passed down from generation to generation.

Breverton

A superbly illustrated guide to the mysteries of myth, legend, and—gulp!—real life.

Breverton's Complete Herbal is a modern reworking of Culpeper's classic reference guide, Culpeper's Complete Herbal. Arranged alphabetically, this book describes over 250 herbs and spices as well as feature entries on scented herb/medicinal gardens, the great herbalists and New World Herbs not included in Culpeper's original text. Each entry provides a description of the herb: its appearance and botanical features, a brief history of its uses in medicine, dyeing and cuisine to bizarre remedies and concoctions designed to get rid of all manner of real and imaginary ailments. As informative as it is entertaining, this

incredibly diverse compendium contains just about everything you'll ever need to know about the properties and provenance of herbs and spices of the world. From amara dulcis to yarrow, all-heal to viper's bugloss, Breverton's Complete Herbal is a modern day treasury of over 250 herbs and their uses.

Invention and innovation are what distinguish the human race from all of the other species on Earth. Throughout history the imagination and pioneering spirit of human kind has compelled us to question why we do things in a certain way and, more importantly, how we can do things better. Celebrating the ingenuity, creativity and resourcefulness that has led to some of the most amazing technological leaps through the ages, Breverton's Encyclopedia of Inventions examines the key innovations and breakthroughs of all time and the genius behind them.

Starting with the building of the pyramids in ancient Egypt and the discovery of the solar system, moving through surgery, dynamite and rockets, to modern technology such as the smart card and genetic engineering, Terry Breverton springs many surprises. He uncovers fascinating and little-known facts: for example, that Price, not Fleming, discovered penicillin; that Swan, not Edison invented the electric light, and that Wallace, not Darwin first advanced the theory of evolution. Tracing the sheer persistence of brilliant men and women across the globe, who fought the prevailing ideas of their times and advanced technology, Breverton's Encyclopedia of Inventions will inspire anyone interested in the history and developments that have changed our lives and shaped our planet's future.

Breverton's Nautical Curiosities is about ships, people and the sea.

However, unlike many other nautical compendiums, the focus of this book is on the unusual, the overlooked or the downright extraordinary. Thus, someone most of us do not know, Admiral William Brown, is given equal coverage to Admiral Nelson. Without Admiral Brown releasing Garibaldi, modern Italy might not exist. And without the barely known genius John Ericsson designing the Monitor, the Confederacy might have won the American Civil War. Readers will be stimulated to read more about the remarkable men - explorers, admirals and trawlermen - who have shaped our world. The sea has had a remarkable effect upon our language. We hear the terms 'steer clear of', 'hit the deck', 'don't rock the boat', 'to harbour a grudge' and the like, and give little thought to them. In the pages of this book, the reader will find the origin of 'bumpkin', a 'brace of shakes', 'born with a silver spoon', 'booby prize', 'to take on board', 'above board',

'bombed' (in the sense of being drunk), the 'blues', 'blind-side', 'blind drunk', 'the pot calling the kettle black', 'reach the bitter end', 'wasters', 'ahoy', 'all at sea', 'to keep aloof', 'piss-artist', 'taken aback', 'barbecue' and 'bamboozle'. Other colourful terms, which have passed out of common usage, such as 'bring one's arse to anchor' (sit down), 'belly timber' (food) and 'bog orange' (potato) are also included, as well as important pirate haunts, technical terms, famous battles, maritime inventors and ship speed records.

From medieval bestiaries to Borges' s Book of Imaginary Beings, we' ve long been enchanted by extraordinary animals, be they terrifying three-headed dogs or asps impervious to a snake charmer' s song. But bestiaries are more than just zany zoology—they are artful attempts to convey broader beliefs about human beings and the natural

order. Today, we no longer fear sea monsters or banshees. But from the infamous honey badger to the giant squid, animals continue to captivate us with the things they can do and the things they cannot, what we know about them and what we don't. With *The Book of Barely Imagined Beings*, Caspar Henderson offers readers a fascinating, beautifully produced modern-day menagerie. But whereas medieval bestiaries were often based on folklore and myth, the creatures that abound in Henderson's book—from the axolotl to the zebrafish—are, with one exception, very much with us, albeit sometimes in depleted numbers. *The Book of Barely Imagined Beings* transports readers to a world of real creatures that seem as if they should be made up—that are somehow more astonishing than anything we might have imagined. The yeti crab, for example, uses its furry claws to farm the bacteria on which it feeds. The waterbear,

meanwhile, is among nature's "extreme survivors," able to withstand a week unprotected in outer space. These and other strange and surprising species invite readers to reflect on what we value—or fail to value—and what we might change. A powerful combination of wit, cutting-edge natural history, and philosophical meditation, *The Book of Barely Imagined Beings* is an infectious and inspiring celebration of the sheer ingenuity and variety of life in a time of crisis and change.

Explore the fascinating myths of Greek and Roman civilizations! The tales of gods and heroes are often turned into tedious discourse that even Ovid would reject. This easy-to-read guide cuts out the boring details, and instead, provides you with a thrilling lesson in classic mythology. From the heights of Mt. Olympus to the depths of the

Underworld, this book takes you on an unforgettable journey through all the major myths born in ancient Greece and Rome, such as Achilles's involvement in the Trojan War; Pluto's kidnapping of the beautiful Proserpina; and the slaying of Medusa by Perseus, the heroic demi-god. You'll also learn all about the wonders of the world as well as the greatest creatures ever recorded in history. Like Charon navigating the River of Wailing, Mythology 101 will guide you through the most glorious (and completely terrifying) tales the ancient world has to offer.

Presents entries on creatures and legends from around the world, featuring mythic entities including dragons, serpents, golems, banshees, nature spirits, and sacred beings.

Meet the world's most unusual monsters in this darkly funny collection of creatures and cryptids from folkloric history. Illustrator Emma SanCartier captures the bizarre and hilarious elements of 17 monsters from around the world in a light, tongue-in-cheek tone, from the Japanese dream-eater Baku and the Persian carnivorous unicorn Shadhavar to the Eastern-European Shurale, a literal tickle monster. Illustrated in lush watercolor, *Monsters You Should Know* is a perfect primer for the many strange, frightening, and compelling things that go bump in the night.
