Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

Peter Foerthmann has been the first port of call for bluewater sailors seeking advice in steering matters for decades. His unrivalled expertise - the product of a lifetime developing and manufacturing windvane self-steering systems and contemplating their every complexity - continues to draw enquiries from all over the world. Now available in six languages, his specialist books present the state of the art and provide reassurance - should any be needed - that the fundamental rules of physics still apply in a world increasingly dominated by bits and bytes. This book recounts both the author's personal history of almost half a century in the windvane self-steering segment of the international marine industry and the story of how a business that once built everything by hand has managed to transform itself into what must surely be one of the smallest high-tech engineering companies in existence. The Windvane Report shares the milestones of the author's progress over the decades and recounts some of the remarkable disputes that have erupted in the sector as well as discussing and comparing important technical developments in the field. A roller-coaster ride through the highs and lows of a life on and by the water, this book offers the reader a wide-ranging insight into how Windpilot and the man behind it came to be what they are today.
