A complete guide to urban technical rescue designed to illustrate specific techniques and procedures in rope rescue, confined space rescue, swift water rescue, trench rescue and structural collapse rescue.

This new updated, fifth edition guide contains over 250 high quality graphic illustrations, command checklists and easy to follow step-by-step procedures for rope rescue, confined space rescue, swiftwater rescue, surface ice rescue, trench rescue, structural collapse rescue and helicopter rescue. Designed to be used during and after a full training program, this guide is an essential tool for rescuers of all levels to assist in safe and efficient technical rescue. Made to be taken in the field, the guide assists rescuers in recall of the most important aspects of techniques and safety.

Third edition of The technical Rescue Riggers Guide, By Rick Lipke, Includes dual capability two tension rope systems. 220 color pages, waterproof, tear resistant.

The Third Edition provides a comprehensive introduction to trench rescue, focusing on the knowledge and skills required to effectively perform rescues in a variety of trench environments.

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.
