Database Programming with JDBC and Java explains how JDBC fits into unitised software applications in which

various functional parts
communicate over a
network. author George
Reese also shows how
to write programs that
take advantage of the
JDBC classes,
emphasising the most
commonly used ones
(such as those that
perform INSERT and
SELECT operations)
but also giving the more
obscure classes their

Database Programming with JDBC and Java, 2nd Edition ...

The following steps are required to create a new Database using JDBC application − Import the packages: Requires that you include the packages containing the JDBC classes needed for database

programming. Most often, using import java.sql.* will suffice.
