Learners explore and describe how succession affects biodiversity by creating an island ecosystem in an interactive game.

Ecological Succession | Texas Gateway

Ecological succession is the process that describes how the structure of a biological community (that is, an interacting group of various species in a desert, forest, grassland, marine environment, and so on) changes over time. Species that arrive first in a newly created environment (such as an island rising out of the sea) are called pioneer species, and they, through their interactions with ...
