## Electrostatic Answer Sheet

The three forces are: gravity pointing downward, the electrostatic force to the side, and the tension towards the hanging point. The force of gravity has a magnitude of  $mg$ . The electrostatic force has a magnitude of  $kq^2/d^2$ , where  $d$  is the distance between the spheres. The three force vectors form a triangle, with the

# Electrostatic Answer Sheet

The electric field produced by stationary source charges is called an electrostatic field. The electric field at a particular point is a vector whose magnitude is proportional to the total force acting on a test charge located at that point, and whose direction is equal to the direction of the force acting on a positive test charge.
