Answer Key For Experimental Variables Pogil

Answer Key For Experimental Variables Pogil Answer Key For Experimental Variables Morgan Park High School Oct 05, 2014 · When scientists set up to do an experiment the first thing they think about is the variables that may affect the outcome of the experiment. An independent variable is a variable that you can change or control. It is the cause of the change in the dependent variable. An example of an independent variable is the amount of water you give a plant. The dependent variable is the height of the plant. The dependent variable is what you are measuring or observing. It is the effect of the independent variable. An example of a dependent variable is the amount of water a plant takes up. The independent variable is the amount of water you give the plant. The dependent variable is the amount of water the plant takes up.

solutions for you to be successful. As understood, capability does not recommend that you have extraordinary points.

Answer Key For Experimental Variables Pogil

An independent condition that may cause a change in the system being studied. Some variables are quantitative like temperature, mass or height. Other variables are recorded in qualitative manner, like color, texture or species. The most important factor is that the scientist runs a controlled experiment.

Morgan Park High School

Experimental variables. STUDY. Flashcards. Learn. Write. Spell. Test. PLAY. Match. Gravity. Created by. gguidotti. Key Concepts: Terms in this set (22) What process occurs in a plant's cells to create oxygen bubbles? Photosynthesis. What gas does the plant produce? Oxygen. What source of energy does the plant have?
