Ford Flathead V8 Car Parts - Speedway Motors

1949-53 Ford Flathead V8. The third and final design of the legendary Ford flathead, the 1949-53 model featured a bolt-on bellhousing and a relocated distributor. Modern insert style bearings were used on both the mains and the rods. Often known as the "8BA", the final flathead design was eventually replaced by the new generation of overhead valve powerplants.

ford flathead v8 engine parts for sale | eBay

The first of the Ford L-head (flathead) V8 engines left the factory on March 9, 1932. This engine used a 90-degree block, with the valves located next to the pistons, pointed upwards. The heads are not truly flat, having four spade-shaped combustion chambers to accommodate the motion of the valves.

The Fabulous Ford Flathead V8 - EngineLabs

The Ford Flathead is a valve-in-block engine and the valves open adjacent to the combustion chamber, rather than from the top, as in later engines. The four different V-8 flathead displacement sizes between 1932 and 1953 are 136, 221, 239 and 337 cubic inches. Step 1 Count the number of studs on the cylinder heads.
