From Dictatorship to Democracy: A Conceptual Framework for Liberation by Gene Sharp is a fascinating working document on methods of non-violent disruption of dictatorial regimes. I read this in one day, and thoroughly enjoyed it. Sharp first analyzes some of the fallacies of both violent confrontation of a regime, and of negotiating with it.

A serious introduction to the use of nonviolent action to topple dictatorships. Based on the author's study, over a period of forty years, on non-violent methods of demonstration, it was originally published in 1993 in Thailand for distribution among Burmese dissidents.

This book systematically explains why some countries are democracies while others are not.

This classic work of comparative history explores why some countries have developed as democracies and others as fascist or communist dictatorships. Originally published in 1966, this classic text is a comparative survey of some of what Barrington Moore considers the major and most indicative world economies as they evolved out of pre-modern political systems into industrialism. But Moore is not ultimately concerned with explaining economic development so much as exploring why modes of development produced different political forms that managed the transition to industrialism and modernization. Why did one

Society modernize into a "relatively free," democratic society (by which Moore means England)? Why did others metamorphose into fascist or communist states? His core thesis is that in each country, the relationship between the landlord class and the peasants was a primary influence on the ultimate form of government the society arrived at upon arrival in its modern age. "Throughout the book, there is the constant play of a mind that is scholarly, original, and imbued with the rarest gift of all, a deep sense of human reality . . . This book will influence a whole generation of young American historians and lead them to problems of the greatest significance." —The New York Review of Books

This book examines Portugal's transition from dictatorship to democracy by focusing on Lourinhã's urbanization and economic development since 1966. Since 1966, Lourinhã's urban landscape has transformed as Portugal democratized. From a rural town with little infrastructure and few institutions in 1966, Lourinhã emerged by 2001 as a modern European town. This work highlights key areas of economic and urban development and argues that Lourinhã's political culture became more institutional, creating a withering expectation of citizen participation in local development, as Portugal transitioned from dictatorship to democracy. Raphael Costa asks whether Portugal was on the path towards democracy before 1974, and if the rapid shift to democracy was the blessing it appeared to be by the 1990s. Did democratization ultimately disenfranchise the Portuguese in important ways? This work uses Lourinhã's development as an example of the

Portuguese experience to argue that the Carnation Revolution, although a watershed in Portugal's politico-cultural evolution, should not be understood as the moment when democracy came to Portugal.

In the early 1990s, Albania, arguably Europe's most closed and repressive state, began a startling transition out of forty years of self-imposed Communist isolation. Albanians who were not allowed to practice religion, travel abroad, wear jeans, or read "decadent" Western literature began to devour the outside world. They opened cafés, companies, and newspapers. Previously banned rock music blared in the streets. Modern Albania offers a vivid history of the Albanian Communist regime's fall and the trials and tribulations that led the country to become the state it is today. The book provides an in-depth look at the Communists' last Politburo meetings and the first student revolts, the fall of the Stalinist regime, the outflows of refugees, the crash of the massive pyramid-loan schemes, the war in neighboring Kosovo, and Albania's relationship with the United States. Fred Abrahams weaves together personal experience from more than twenty years of work in Albania, interviews with key Albanians and foreigners who played a role in the country's politics since 1990—including former Politburo members, opposition leaders, intelligence agents, diplomats, and founders of the Kosovo Liberation Army—and a close examination of hundreds of previously secret government records from Albania and the United States. A rich, narratively-driven account, Modern Albania gives readers a front-row seat to the dramatic events of the last battle of Cold War Europe.

Around the developing world, political leaders face a dilemma: the very information and communication technologies that boost economic fortunes also undermine power structures. Globally, one in ten internet users is a Muslim living in a populous Muslim community. In these countries, young people are developing political identities online, and digital technologies are helping civil society build systems of political communication independent of the state and beyond easy manipulation by cultural or religious elites. With unique data on patterns of media ownership and technology use, *The Digital Origins of Dictatorship and Democracy* demonstrates how, since the mid-1990s, information technologies have had a role in political transformation. Democratic revolutions are not caused by new information technologies. But in the Muslim world, democratization is no longer possible without them.

Fighting Tyranny combines two of Gene Sharp's books in a single pocket-sized volume - *From Dictatorship to Democracy* and *The Anti-Coup*. At a time when governments around the world are becoming increasingly authoritarian and aggressive towards their citizens, this book offers ideas and nonviolent methods of action to successfully defend or establish democratic systems. *From Dictatorship to Democracy - A conceptual Framework for Liberation* is a practical exploration of the techniques of nonviolent struggle against totalitarian regimes. This book has been used successfully by activists from all sides of the political spectrum, by grassroots activists and state-backed colour revolutionaries alike, to overthrow

governments and effect political change. The Anti-Coup - co-authored with Bruce Jenkins - explores the possibilities of nonviolent defence against coups d'état. Coups may happen to a functioning democracy, or in the power vacuum that occurs after a government has been ousted. The Anti-Coup describes methods to block coups and putsch attempts which can be used by citizens and governments.

This comprehensive survey of Spain's history looks at the major political, social, and economic changes that took place from the end of the Civil War to the beginning of the twenty-first century. A thorough introduction to post-Civil War Spain, from its development under Franco and subsequent transition to democracy up to the present day Tusell was a celebrated public figure and historian. During his lifetime he negotiated the return to Spain of Picasso's Guernica, was elected UCD councillor for Madrid, and became a respected media commentator before his untimely death in 2005 Includes a biography and political assessment of Francisco Franco Covers a number of pertinent topics, including fascism, isolationism, political opposition, economic development, decolonization, terrorism, foreign policy, and democracy Provides a context for understanding the continuing tensions between democracy and terrorism, including the effects of the 2004 Madrid Bombings
