From Head Shops to Whole Foods traces the brief lifespan of this economic phenomenon and then details how mainstream businesses co-opted and appropriated the legacies of these ill-fated idealistic endeavors, especially with calls for ethical consumption from the likes of Michael Pollan and other activists in the twenty-first century. Deceptively, this is not a declensionist narrative. Rather ...

In From Head Shops to Whole Foods, Joshua Clark Davis explores the untold history of 1960s-era Social Capitalism. It was an era of activist entrepreneurs and humanistic practices like shared ownership, limited growth, and democratic workplaces. It was an alternative to traditional profit-focused corporate business models. By the late 70s there were hundreds, if not thousands, of like-minded ...

In the 1960s and ' 70s, a diverse range of storefronts—including head shops, African American bookstores, feminist businesses, and organic grocers—brought the work of the New Left, Black Power, feminism, environmentalism, and other movements into the marketplace. Through shared ownership, limited growth, and democratic workplaces, these activist entrepreneurs offered alternatives to conventional profit-driven corporate business models. By the middle of the 1970s, thousands of these enterprises operated across the United States—but only a handful survive today. Some, such as Whole Foods Market, have abandoned their quest for collective political change in favor of maximizing profits. Vividly portraying the struggles, successes, and sacrifices of these unlikely entrepreneurs, From Head Shops to Whole Foods writes a new history of social movements and capitalism by showing how activists embraced small businesses in a way few historians have considered. The book challenges the widespread but mistaken idea that activism and political dissent are inherently antithetical to participation in the marketplace. Joshua Clark Davis uncovers the historical roots of contemporary interest in ethical consumption, social enterprise, buying local, and mission-driven business, while also showing how today ' s companies have adopted the language—but not often the mission—of liberation and social change.

In the late twentieth century, nothing united union members, progressive students, Black and Chicano activists, Native Americans, feminists, and members of the LGBTQ+ community quite as well as Coors beer. They came together not in praise of the ice cold beverage but rather to fight a common enemy: the Colorado-based Coors Brewing Company. Wielding the consumer boycott as their weapon of choice, activists targeted Coors for allegations of antiunionism, discrimination, and conservative political ties. Over decades of organizing and coalition-building from the 1950s to the 1990s, anti-Coors activists molded the boycott into a powerful means of political protest. In this first narrative history of one of the longest boycott campaigns in U.S. history, Allyson P. Brantley draws from a broad archive as well as oral history interviews with long-time boycotters to offer a compelling, grassroots view of anti-corporate organizing and the unlikely coalitions that formed in opposition to the iconic Rocky Mountain brew. The story highlights the vibrancy of activism in the final decades of the twentieth century and the enduring legacy of that organizing for communities, consumer activists, and corporations today.

Explores business development in the Black power era and the centrality of economic goals to the larger black freedom movement.

Examines the relationship between the recent marketing aimed at the gay community and the movement that struggles to achieve equal rights for gay men and lesbians.

Silicon Valley technology is transforming the way we work, and Uber is leading the charge. An American startup that promised to deliver entrepreneurship for the masses through its technology, Uber instead built a new template for employment using algorithms and Internet platforms. Upending our understanding of work in the digital age, Uberland paints a future where any of us might be managed by a faceless boss. The neutral language of technology masks the powerful influence algorithms have across the New Economy. Uberland chronicles the stories of drivers in more than twenty-five cities in the United States and Canada over four years, shedding light on their working conditions and providing a window into how they feel behind the wheel. The book also explores Uber ' s outsized influence around the world: the billion-dollar company is now influencing everything from debates about sexual harassment and transportation regulations to racial equality campaigns and labor rights initiatives. Based on award-winning technology ethnographer Alex Rosenblat ' s firsthand experience of riding over 5,000 miles with Uber drivers, daily visits to online forums, and face-to-face discussions with senior Uber employees, Uberland goes beyond the headlines to reveal the complicated politics of popular technologies that are manipulating both workers and consumers.

"This book is a message from autistic people to their parents, friends, teachers, coworkers and doctors showing what life is like on the spectrum. It's also my love letter to autistic people. For too long, we have been forced to navigate a world where all the road signs are written in another language." With a reporter's eye and an insider's perspective, Eric Garcia shows what it's like to be autistic across America. Garcia began writing about autism because he was frustrated by the media's coverage of it; the myths that the disorder is caused by vaccines, the narrow portrayals of autistic people as white men working in Silicon Valley. His own life as an autistic person didn't look anything like that. He is Latino, a graduate of the University of North Carolina, and works as a journalist covering politics in Washington D.C. Garcia realized he needed to put into writing what so many autistic people have been saying for years: autism is a part of their identity, they don't need to be fixed. In We're Not Broken, Garcia uses his own life as a springboard to discuss the social and policy gaps that exist in supporting those on the spectrum. From education to healthcare, he explores how autistic people wrestle with systems that were not built with them in mind. At the same time, he shares the experiences of all types of autistic people, from those with higher support needs, to autistic people of color, to those in the LGBTQ community. In doing so, Garcia gives his community a platform to articulate their own needs, rather than having others speak for them, which has been the standard for far too long.

How can this field develop in an age of global markets, growing information technology, and diminishing resources? A transnational collaboration between two senior scholars, Reimagining Business History offers direction in forty-four short, pithy essays.

This highly illustrated, step-by-step guide gives detailed instructions for dozens of different manipulation techniques, covering all levels of the spine, thorax, and pelvis. It also includes a helpful overview of the principles and theory of spinal manipulation and its use in clinical practice. The accompanying DVD contains video clips demonstrating the techniques described in the book. The new edition is a highly illustrated, step-by-step guide to 41 manipulation techniques commonly used in clinical practice. The book also provides the related theory essential for safe and effective use of manipulation techniques.
