communication systems are applied. For transmission of a bit stream (which may represent the original digital information, e.g. ASCII string, or the analog signal, after its conversion to a digital form), digital communication systems are used. The basic blocks of an analog communication system are given in Figure 1.

Welcome to Jacobs! - Jacobs Engineering Group
Jacobs assessed the feasibility of increasing the height of a 330-hectare area of land to approximately two meters above the highest measured sea level. We are also developing a conceptual land use plan that addresses resilience issues impacting the atoll, including rapid urbanization, limited water supply, ecosystem services and an increasing risk of land inundation from king tides.
