Disability, Space, Architecture: A Reader takes a groundbreaking approach to exploring the interconnections between disability, architecture and cities. The contributions come from architecture, geography, anthropology, health studies, English language and literature, rhetoric and composition, art history, disability studies and disability arts and cover personal, theoretical and innovative ideas and work. Richer approaches to disability – beyond regulation and design guidance – remain fragmented and difficult to find for architectural and built environment students, educators and professionals. By bringing together in one place some seminal texts and projects, as well as newly commissioned writings, readers can engage with disability in unexpected and exciting ways that can vibrantly inform their understandings of architecture and urban design. Most crucially, Disability, Space, Architecture: A Reader opens up not just disability but also ability – disability – as a means of refusing the normalisation of only particular kinds of bodies in the design of built space. It reveals how our everyday social attitudes and practices about people, objects and spaces can be better understood through the lens of disability, and it suggests how thinking differently about disability can enable innovative and new kinds of critical and creative architectural and urban design education and practice.

The Driving Instructor's Handbook is widely recognized in the driver training industry as the authoritative reference guide for trainee and qualified instructors. This best-selling handbook covers every aspect of the profession, from the role and the characteristics needed to do the job well, preparation for the three ADI examination requirements (Theory and hazard perception, Driving ability and Instructional ability), through to the driving test and driving larger vehicles. Updated for 2011 with the latest information relating to the ever-changing driving industry, The Driving Instructor's Handbook is essential reading for anyone involved in the training of new drivers and instructors at all levels.

Losing a Hand was written by Ed with over forty eight years experience. It documents how he first came in contact with amputee friends, and then tells of how he chose amputation for himself and then with the aid of a power saw removed his own hand. The book follows with stories of his adaptation -- and success -- into amputee life. The lessons he learned and how they learned them should be inspiring to all, but especially to those people who know amputees or are amputees themselves, either by choice or by fate. The book also contains many case studies of others who lost one or more hands. It's written in a wonderful (and easy to read) down-to-earth style and comes highly recommended.

The internationally best-selling author of Goodbye, Things shares insights and practices to help us embrace habits and become the best versions of ourselves. Fumio Sasaki changed his life when he became a minimalist. But before minimalism could really stick, he had to make it a habit. All of us live our lives based on the habits we've formed, from when we get up in the morning to what we eat and drink to how likely we are to actually make it to the gym. In Hello, Habits, Sasaki explains how we can acquire the new habits that we want—and get rid of the ones that don't do us any good. Drawing on leading theories and tips about the science of habit formation from cognitive psychology, neuroscience, and sociology, along with examples from popular culture and tried-and-tested techniques from his own life, he unravels common misperceptions about "willpower" and "talent," and offers a step-by-step guide to success. Ultimately, Sasaki shows how ordinary people like himself can use his principles of good habit-making to improve themselves and change their lives.

Crime involving cars – whether involving offences by drivers or theft of and from cars – represents a substantial proportion of offences committed, and occupies an enormous amount of police time. But it is not always perceived as the serious crime that it is: many traffic offences cause enormous harm in terms of death and injury, but are often not regarded seriously by drivers, the criminal justice system and the state. Other than theft of and from cars it is arguable that car crime is socially constructed as 'not real crime' or 'not even crime'. This book is the first to survey the whole area of car crime. It considers car crime as a coherent whole, addressing the concept of car culture; considers car crime in its various guises in relation to issues such as masculinity, gender, car usage and the environment; considers the historical roots of legislation concerning crime committed in the car, through to current legislation and its effects and implications. The book also addresses issues of crime prevention, and in particular the role of car manufacturers in making cars more crime proof.

Haynes disassembles every subject vehicle and documents every step with thorough instructions and clear photos. Haynes repair manuals are used by the pros, but written for the do-it-yourselfer.

Man up and discover the practical and inspirational information all men should know! While it's definitely more than just monster trucks, grilling, and six-pack abs, true manliness is hard to define. The words macho and manly are not synonymous. Taking lessons from classic gentlemen such as Benjamin Franklin and Theodore Roosevelt, authors Brett and Kate McKay have created a collection of the most useful advice every man needs to know to live life to its full potential. This book contains a wealth of information that ranges from survival skills to social skills to advice on how to improve your character. Whether you are braving the wilds with your friends, courting your girlfriend, or raising a family, inside you'll find practical information and inspiration for every area of life. You'll learn the basics all modern men should know, including how to: -Shave like your grandpa -Be a perfect houseguest -Fight like a gentleman using the art of bartitsu -Help a friend with a problem -Give a man hug -Perform a fireman's carry -Ask for a woman's hand in marriage -Raise resilient kids -Predict the weather like a frontiersman -Start a fire without matches -Give a dynamic speech -Live a well-balanced life So jump in today and gain the skills and knowledge you need to be a real man in the 21st century.

This book constitutes late breaking papers from the 22nd International Conference on Human-Computer Interaction, HCI 2020, which was held in July 2020. The conference was planned to take place in Copenhagen, Denmark, but had to change to a virtual conference mode due to the COVID-19 pandemic. From a total of 6326 submissions, a total of 1439 papers and 238 posters have been accepted for publication in the HCI 2020 proceedings before the conference took place. In addition, a total of 333 papers and 144 posters are included in the volumes of the proceedings published after the conference as "Late Breaking Work" (papers and posters). These contributions address the latest research and development efforts in the field and highlight the human aspects of design and use of computing systems. The 34 late breaking papers presented in this volume were organized in two topical sections named: Virtual, Augmented and Mixed Reality Design and Implementation; and User Experience in Virtual, Augmented and Mixed Reality.
