This book examines the ways in which quality management methods, tools, and practices help improve an organization ' s performance and achieve sustainable competitive advantages. This volume includes quality techniques and tools such as the EFQM Model, SERVPERF model, E-S-Qual scale and the ISO 9001 certification and provide a wide variety of empirical studies in different economic sectors. In the current economic environment, characterized by economic turmoil and fierce competition, quality management has become a key strategy for organizations to overcome today ' s challenges. Organizations benefits from implementing quality management systems by following two approaches. First, they implement quality practices aimed at ensuring customer satisfaction by considering consumer expectations and establishing strategies accordingly. Second, organizations improve processes by establishing efficient and effective process management systems that improve productivity, lower costs, reduce unnecessary expenses, eliminate all non-value added activities, and ultimately maximize excellence and customer satisfaction. Quality management thereby provides tools, techniques, and methods for continuous process improvement in both the professional and academic worlds, which, when implemented by organizations in times of crisis, enable more effective administration of activities undertaken by managers. Containing contributions from various academics and scholars, this new book provides cutting edge research, methods and techniques providing a reference manual for academics, scholars, practitioners and policy-makers.

The definitive book on mining the Web from the preeminent authority.

This volume constitutes the thoroughly refereed conference proceedings of the 26th International Conference on Industrial Engineering and Other Applications of Applied Intelligence Systems, IEA/AIE 2013, held in Amsterdam, The Netherlands, in June 2013. The total of 71 papers selected for the proceedings were carefully reviewed and selected from 185 submissions. The papers focus on the following topics: auctions and negotiation, cognitive modeling, crowd behavior modeling, distributed systems and networks, evolutionary algorithms, knowledge representation and reasoning, pattern recognition, planning, problem solving, robotics, text mining, advances in recommender systems, business process intelligence, decision support for safety-related systems, innovations in intelligent computation and applications, intelligent image and signal processing, and machine learning methods applied to manufacturing processes and production systems.

More and more sailors and powerboaters are buying and relying on electronic and electric devices aboard their boats, but few are aware of proper installation procedures or how to safely troubleshoot these devices if they go on the blink.

This classic work on the art of duck shooting outlines its techniques, describes the various species of geese, swans, and ducks, and notes the causes of declining populations

PW50 (1981-1983; 1985-1987; 1990-2002), PW80 (1983; 1985; 1991-2002), BW80 (1986-1988; 1990)

In recent years public awareness of the long term toxic affects heavy metal ions in waters and wastewaters has increased significantly. Environmental agencies have been imposing more and more stringent discharge limits on industries involved in processes using metal ions. Numerous industries produce aqueous effluents con taining metal ions and particularly copper and cadmium. Copper sulfate is used on a large scale in the electroplating industries. In addition, copper salts are used as fungicides, timber preservatives, insecticides, paint corrosion inhibitors and in dyestuffs. Cadmium is used in the manufacture of nickel-cadmium batteries, as a corrosion inhibitor and control rods in the nuclear industry. The European Com munity has listed cadmium as one of the most dangerous metal due to its toxicity, persistence and bioaccumulation in List 1 of its Directive 76/464/EEC. Therefore, it is important that methods for the removal of these metal ions are found and that the mechanism of removal is characterized and understood. A number of adsorb ents have been identified which are capable of removing copper (Panday et al. , 1985; Ho et al. , 1996; Low and Lee, 1987; Low et al. , 1993; Quek et al. , 1998) and cadmium (Battacharya and Venkobachar, 1984; Namasivayam and Ranganathan, 1995; Periasamy and Namasivayam, 1994) from aqueous solutions. Sorption kin etic models have been proposed for some systems.

Develop a strong conceptual understanding of the role that quantitative methods play in today's decision-making process. Written for the non-mathematician, this applications-oriented text introduces today's many quantitative methods, how they work, and how decision makers can most effectively apply and interpret data. A strong managerial orientation motivates while actual examples illustrate situations where quantitative methods make a difference in decision making.
