With the second edition of Gray ' s Dissection Guide for Human Anatomy came a number of important changes, the principal stimulus for which was the publication of the first edition of Gray ' s Anatomy for Students (GAFS) in 2005, a year after the publication of the first edition of our dissection guide. The publication of GAFS provided the opportunity to coordinate the second edition of our dissection guide with that textbook.

This dissection guide was designed as an aid to human cadaver dissection by first year medical students. The four fundamental tools of learning gross human anatomy (the cadaver, a dissection guide, a textbook, and an atlas) are amplified in their relevance by the use of additional resources now widely available.

Welcome to the human anatomy laboratory that accompanies the lecture in Biology 2325 - Human Anatomy. This lab provides you with a rare opportunity to explore anatomy using dissected human cadavers. Exploring cadavers is the true approach to learning anatomy, that is, experiencing anatomy in its three-dimensional reality.

organized regionally and each dissection starts with an overview of the anatomical features of the area along with key concepts such as muscle function, innervation and blood supply.

~~ToLTech - VH Dissector for Medical Education~~

Dissection is the best way to provide a tactile sense of body tissues. In fact the word “anatomy” comes from Greek “to dissect” or “cut up.”. Currently, even with virtual reality headsets, nothing can reproduce the learning of anatomy through your actual tactile sense (in addition to other senses).

Somatosensory observations regarding texture, relative size, and weight of tissues gained in the anatomy cadaver lab cannot be reproduced with virtual technology. The struggles of exploring through dissection give way to an appreciation of the layers of fat, fascia, and connective tissue.

~~Report: Prioritizing Cadaveric Dissection~~

Dissection is the dismembering of the body of a deceased animal or plant to study its anatomical structure. Autopsy is used in pathology and forensic medicine to determine the cause of death in humans. Less extensive dissection of plants and smaller animals
