The Fourth Edition of International Accounting provides an overview of the broadly defined area of international accounting, but also focuses on the accounting issues related to international business activities and foreign operations. This edition also includes substantially updated coverage of the International Accounting Standards Board (IASB) and International Financial Reporting Standards (IFRS). The unique benefits of this textbook include its up-to-date coverage of relevant material, extensive numerical examples provided in most chapters, two chapters devoted to the application of International Financial Reporting Standards (IFRS), and coverage of nontraditional but important topics such as strategic accounting issues of multinational companies, international corporate governance, and corporate social responsibility reporting.

This research monograph critically examines convergence of financial reporting in Germany by taking into account the influence of political, social and economic factors on accounting. This study makes an original and significant contribution by examining issues and biases in the convergence process that may challenge the assumption of superiority,

International Accounting can be viewed in terms of accounting issues uniquely confronted by companies involved in international business. It also can be viewed more broadly as the study of how accounting is practiced in each and every country around the world, learning about and comparing the differences in various accounting methods. This is unique in its content and is up-to-date with relevant material integrated throughout the textbook. In its first year, this text captured approximately 30 percent of the market.
