Ira N. Levine (Chemistry Department, Brooklyn College, City University of New York, Brooklyn, New York) and published by McGraw-Hill in 2009. This textbook is for the standard undergraduate course in physical chemistry . To make the presentation easy to follow, the book gives careful definitions and explanations of concepts, full details of most derivations, and reviews of relevant topics in mathematics and physics.

Physical Chemistry 6th ed -  
Levine.pdf

The physical chemistry text by Levine is a detailed text which I believe is best suited to the graduate student level. Someone who already has a basic understanding of physical chemistry, a solid calculus base, a course in matrix algebra, and a differential equations course can profit most from the detailed explanations in this book.
