Descubre a la reina más fascinante del Antiguo Egipto. Por el autor de los best sellers El ladrón de tumbas y La conjura del faraón. La novela que más de 300.000 lectores estaban esperando. Esta es la historia de una mujer que desafió el orden establecido para convertirse en el faraón más poderoso de Egipto. Gobernó en el momento de máximo esplendor del país, cuando su ejército era el más fuerte del mundo y el reino disfrutaba de gran prosperidad. Y dejó un inmenso legado en forma de obras arquitectónicas que hoy en día nos siguen fascinando. Con rigor y un estilo tan magico como el tiempo que retrata, Antonio Cabanas nos sumerge en su vida: su infancia, marcada por la influencia de su abuela Nefertari; su primera juventud, en la que sufrió la preeminencia de sus hermanos sobre ella; y su etapa posterior cuando, convencida de sus cualidades para gobernar, persiguió sus ambiciones con la ayuda del sacerdote y arquitecto real Senenmut. Él fue su cómplice en las intrigas palaciegas y juntos vivieron una apasionante historia de amor que ha trascendido hasta nuestros días. Una novela magistral en la que el Antiguo Egipto se despliega ante nuestros ojos en toda su grandeza a través de una de sus protagonistas más carismáticas.

Un libro cuya lectura no dejará indiferente a nadie. Juan Sebastián de Elcano, no fue el primero en descubrir la curvatura cerrada de la Tierra. La naturaleza del mundo subterráneo es tan sorprendente y bella como la del mundo de arriba. Budistas e hindúes aseguran que desde el Kaylash, monte sagrado del Tíbet, se accede a un universo donde seres de distintas etnias conviven constituyendo naciones subordinadas a la autoridad de Shivá. En el horizonte de la superficie terrestre, la luz se desvía a por efecto de la gravedad. En el mundo escondido, la cambiante gravedad provoca, sin solución de continuidad, la discriminación de las frecuencias que integran el espectro cromático visible.

A three volume index by personality, institution and subject to the critical bibliographies on the history of science published in ISIS from 1913 to 1965. References in the bibliographies are to items in books, journals, reports, documents, etc. An excellent starting point for researching a topic in the history of science.
