En el ejemplo de escalas de reducción (1:100) significa que una unidad en el dibujo equivale a 100 unidades en la realidad, o dicho de otra forma, se ha reducido el objeto 100 veces. Si tenemos ahora en cuenta un ejemplo de escala de ampliación (5:1) significa que 5 unidades en el dibujo equivalen a una unidad en la realidad, o lo que es lo mismo, hemos ampliado el dibujo 5 veces.

This book provides a comprehensive overview of acute and chronic critical limb ischemia (CLI). Loss of an extremity, or a portion thereof, is not necessarily a life-ending process, but it is a debilitating experience whether involvement is of the upper or lower extremity. It reviews the epidemiology,

pathophysiology, etiology, physical examination, imaging modalities, diagnosis, and treatment of limb ischemia. It investigates the most frequent as well as the more unusual etiological processes that may lead to the most dreaded concern of patients and families: amputation. The therapeutics of CLI has been significantly advanced through the multidisciplinary approach to the patient and disease, a focus that is explored in detail throughout the book. Surgical and endovascular treatment guidelines as well as medical therapy, wound healing, and long-term care are discussed. Featuring an extensive illustration program, *Critical Limb Ischemia: Acute and Chronic*, is a valuable resource for vascular and endovascular surgeons, vascular medicine specialists, interventional radiologists, and cardiologists.

This book explores the ways in which melt flow behaviour can be exploited by the plastics engineer and technician for increased efficiency of processing operation, control of end product properties and selection and development of polymers for specific purposes. (reissued with minor corrections 1994)

Otl Aicher's writings are explorations of the world, a substantive part of his work. In moving through the history of thought and design, building and construction, he assures us of the possibilities of arranging existence in a humane

fashion. As ever he is concerned with the question of the conditions needed to produce a civilised culture. These conditions have to be fought for against apparent factual or material constraints and spiritual and intellectual substitutes on offer. Otl Aicher likes a dispute. For this reason, the volume contains polemical statements on cultural and political subjects as well as practical reports and historical exposition. He fights with productive obstinacy, above all for the renewal of Modernism, which he claims has largely exhausted itself in aesthetic visions; he insists the ordinary working day is still more important than the "cultural Sunday". This third edition has been written to thoroughly update the coverage of injection molding in the World of Plastics. There have been changes, including extensive additions, to over 50% of the content of the second edition. Many examples are provided of processing different plastics and relating the results to critical factors, which range from product design to meeting performance requirements to reducing costs to zero-defect targets. Changes have not been made that concern what is basic to injection molding. However, more basic information has been added concerning present and future developments, resulting in the book being more useful for a long time to come. Detailed explanations and interpretation of individual subjects (more than 1500) are provided, using a

total of 914 figures and 209 tables. Throughout the book there is extensive information on problems and solutions as well as extensive cross referencing on its many different subjects. This book represents the ENCYCLOPEDIA on IM, as is evident from its extensive and detailed text that follows from its lengthy Table of CONTENTS and INDEX with over 5200 entries. The worldwide industry encompasses many hundreds of useful plastic-related computer programs. This book lists these programs (ranging from operational training to product design to molding to marketing) and explains them briefly, but no program or series of programs can provide the details obtained and the extent of information contained in this single sourcebook.
