Logistics Supply Chain Management Creating

When a company creates a logistics strategy it is defining the service levels at which its logistics organization is at its most cost-effective. Because supply chains are constantly changing and evolving, a company may develop a number of logistics strategies for specific product lines, specific countries, or specific customers.

---

Create a Logistics Strategy for Supply Chain Management

There is a growing recognition that it is through logistic efficiency and effective management of the supply chain that the twin goals of cost reduction and service enhancement can be achieved. Enhanced by diagrams, case-studies and chapter summaries, Logistics and Supply Chain Management looks at the tools, core processes and initiatives to ensure businesses gain and maintain their competitive advantage.

---

Logistics & Supply Chain Management: creating value-adding ...

Supply chain as a whole is about creating net value to the company's business strategy in which logistics plays a significant part. If the company's competitive edge is fast delivery like Amazon, then the logistical cost is going to be higher, but the service is reliable, and consumers are willing to pay that extra cost in return for comfort.
