Management Information Systems: Managing the Digital Firm ...

A management information system is an information system used for decision-making, and for the coordination, control, analysis, and visualization of information in an organization. The study of the management information systems involves people, processes and technology in an organizational context. In a corporate setting, the ultimate goal of the use of a management information system is to increase the value and profits of the business. This is done by providing managers with timely and approp

"As the world economy becomes more interdependent and competition more global, the information technology management challenges of enabling the global marketplace must be met with innovative solutions. Covering both technological barriers and managerial challenges, this discussion includes international issues such as managerial experiences in Brazilian hotels, competition in the Asian automotive industry, e-business in Thailand, and job security in Egypt. A business-model handbook for the challenges faced by developing nations is also provided."

Explores the many issues surrounding living and working in a global environment. Relates how necessary it is for companies to conduct business while taking a global perspective to their operations.

Intelligent Support Systems for Marketing Decisions examines new product development, market penetration strategies, and other marketing decisions utilizing a confluence of methods, including Decision Support Systems (DSS), Artificial Intelligence in Marketing and Multicriteria Analysis. The authors systematically examine the use and implementation of these methodologies in making strategic marketing decisions. Part I discusses the basic concepts of multicriteria analysis vis-à-vis marketing decisions and in new product development situations. Part II presents basic concepts from the fields of Information Systems, Decision Support Systems, and Intelligent Decision Support Methods. In addition, specialized categories of DSS (multicriteria DSS, web-based DSS, group DSS, spatial DSS) are discussed in terms of their key features and current use in marketing applications. Part III presents IDSS and a multicriteria methodology for new product development. Further chapters present a developmental strategy for analyzing, designing, and implementing an Intelligent Marketing Decision Support System. The
