Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. BlackwellAssistant Secretary for Maritime Affairs

Fatal Feverfew is set in an isolated healing retreat in the west of England. Lucia, accompanied by her husband and cat, arrives there to recuperate from a recent illness only to find that she is being suspected of poisoning their hostess. Lucia reluctantly takes on the role of detective and, with the help of the local doctor, succeeds in uncovering the true course of events and winning her husband's respect. Following in the tradition of the country house murder mystery, Fatal Feverfew is one of three medically themed novels written by Jennifer Barraclough in the 1980s but not published until thirty years later. Like the other books in the trio, it draws on her experience in psychiatry and general practice, and takes a gently satirical approach to the serious themes of medical disorders, marital disharmony and unnatural death.
