The first double-decker motor bus in Paris, the Schneider Brillé P2, appeared in 1906. It was designed to carry more passengers and to replace the horse-drawn double-decker omnibus. Like trams and omnibuses, double-decker motor buses included two classes of travel: first class inside the car and second class outdoors on top. But this type of vehicle was withdrawn in 1911 because one of them ...

Patrick Dyer's ninth book in the 'at work' series marks a return to Scania to study the 3-series trucks produced between 1988 and 1996, with the emphasis on the 113 and 143 models. In much the same way as these trucks evolved from the previous 2-series and LB (1-series) so too does the book, taking the story forward from the previous titles covering those ranges.For Scania, masters of the modular system and evolutionary engineering processes, the 3-series represented the pinnacle of development for designs born decades earlier. Industry recognition of its achievement came early with the range being awarded the Truck of the Year title in 1989.With over 200 photographs provided by the manufacturer and enthusiasts, Scania 113 & 143 at Work charts the story of the 3-series through informative text in the popular and familiar style of previous 'at work' titles from the same author.

This book analyses the multinational enterprise using the example of the world motor industry. It begins by examining the multinational enterprise in general, considering its nature, the economic theory of its behaviour and its effects on the nation state. It goes on to explore the growth and development of the multinational motor industry, and then surveys the state of the motor industry, and the role of multinationals in it, in various types of economy, using case studies from the UK, USA, Canada, Australia, Brazil and India.

The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

A research bulletin for the worldwide automotive industry.

A photographic celebration of this popular local bus operator. This book aims to show the variety of vehicles and liveries from 1980 until 2020.
