Start with 1 and 1/2 turns each from the light closed position. Fine tune the (side) idle adjuster for your smooth idle speeds and the power adjustment on the bottom of the float bowl under load. There should be an arrow pointer on the choke handle. Turning the arrow clockwise closes the choke!

My tiller engine has two choke symbols; straight line up ...

Choke valves are important for naturally-aspirated gasoline engines because small droplets of gasoline do not evaporate well within a cold engine. By restricting the flow of air into the throat of the carburetor, the choke valve reduces the pressure inside the throat, which causes a proportionally-greater amount of fuel to be pushed from the main jet into the combustion chamber during cold ...
