Should national governments regulate foreign investment? The question is hotly contested in today's international trade debates. Barbara Jenkins here addresses this complex issue in a timely account of market relationships among North American nations. Jenkins provides up-to-date, detailed analyses of foreign investment regulations and policies in Canada, Mexico, and the United States. She identifies inherent contradictions in the general tactic that all three countries have pursued--simply relying on the pressures of the market rather than planning active strategy--and she assesses the likely effects on foreign investment of the recently concluded Canada--U.S. Free Trade Agreement and the potential North American free trade agreement. Free trade and the absence of adjustment policy, she argues, expose key political actors such as business and labor too broadly to market forces. The result is a projectionist reaction on the part of these domestic actors, which ultimately defeats efforts to liberalize trade and investment relations. In current approaches to foreign investment regulation, Jenkins detects divergent trends among the three countries: while Ottawa and Mexico City continue to liberalize their investment strategies, Washington is growing more interventionist. She shows, however, that the interventionism of the United States reflects a nationalistic trend rather than a commitment to a coherent strategy. Cautioning that the conclusion of a North American free trade agreement will only exacerbate the inadequacies of current policies, Jenkins concludes by offering recommendations for future action. The Paradox of Continental Production will be stimulating reading for policymakers, political economists, and other observers of Canadian, Mexican, and U.S. politics.

Just a few decades ago, the Koreans were an impoverished, agricultural people. In one generation they moved from the fields to Silicon Valley. The nature and values of the Korean people provide the background for a more detailed examination of the complex history of the country, in particular its division and its emergence as an economic superpower. Who are these people? And where does their future lie? In this absorbing and enlightening account, Michael Breen provides compelling insight into the history and character of this fascinating nation.

It brings context to readers by answering more than 1,700 commonly asked questions about the Good Book, including: • How has archeology contributed to understanding the Bible? • What are some of the most notable Bible translations through the ages? • What was the Day of Atonement? • How did Gideon obey God ' s call? • According to Peter, what was the benefit of faith? • What is the Apocrypha? This comprehensive resource provides concise, straightforward information, drawing from five different translations of the Bible and other sources, it's designed to let even casual readers dig deeply into the Bible. It helps bring the Good Book's parables, stories, history, and power to your life.

"This treasury surveys nearly three hundred years of quilt history, techniques, patterns, and styles. Traveling all over the country to conduct research and to collect quilts, the authors have assembled a richly illustrated study of traditional quilts."

"From the simple, serviceable quilts of the early colonists to the work of twentieth century quilters, this volume surveys virtually every type of quilt and pattern, detailing the techniques, tools, fabrics, and dyes. The abundant historical and practical information offers guidelines for establishing the age of antique quilts and provides careful instructions for cleaning and care of heirloom quilts."--BOOK JACKET.

Continues the adventures of Lorelei Lee, an attractive American diamond-lover of the Roaring Twenties.

Hoping to reconcile with the mother of his child, reluctant contract killer John Rain inadvertently places them in the path of dangerous enemies and is forced to recruit the help of his nemesis from the Japanese FBI and an ex-Marine sniper. Reprint.

Ecology of Insect Vector Populations provides a review and appraisal of the ecology of insect vectors of disease, with particular attention to the problems of sampling adult insect vector populations. The book examines the manner in which the inter-related problems of insect ecology, behavior, and population sampling have been explored over a wide range of investigations on disease vectors. The text focuses mainly on the study of blood-sucking dipterous insects such as tse-tse flies, mosquitoes, black-flies, and midges along with the appraisal of relevant studies on house-fly and blow-fly populations. The studies of the ecology of the wingless vectors of disease or plague such as the fleas are carried out extensively. The dissertation will be of interest to medical entomologists, animal ecologists, and epidemiologists.
