Aqil Hussain Barlas: Mirza Aqil Hussain Barlas (July 29, 1927 – December 21, 1989) was a lawyer and diplomat, known for his translations from Persian. Aqel : Aqel (Persian: آقل, also Romanized as 'ʔqel; also known as Agir and 'Aqʔl) is a village in Kolah Boz-e Sharqi Rural District, in the Central District of Meyaneh County, East Azerbaijan Province, Iran.

Vols. include Proceedings of the conference of the Indian Society of Agricultural Economics.

This timely and original handbook paves the way to success in plant-based drug development, systematically addressing the issues facing a pharmaceutical scientist who wants to turn a plant compound into a safe and effective drug. Plant pharmacologists from around the world demonstrate the potentials and pitfalls involved, with many of the studies and experiments reported here published for the first time. The result is a valuable source of information unavailable elsewhere.

Biopolymer-Based Composites: Drug Delivery and Biomedical Applications presents a comprehensive review on recent developments in biopolymer-based composites and their use in drug delivery and biomedical applications. The information contained in this book is critical for the more efficient use of composites, as detailed up-to-date information is a pre-requirement. The information provided brings cutting-edge developments to the attention of young investigators to encourage further advances in the field of bio-composite research. Currently, biopolymers are being investigated for the design of various drug delivery and biomedical devices due to their non-toxic, biodegradable and biocompatible nature. Mostly, biopolymer-based solid orals, gels, hydrogel beads, and transdermal matrices have been designed in order to control drug/protein release in simulated bio-fluids. Presents the most updated information in the field of pharmaceutical and biological sciences Contains color figures and illustrations to help users understand key topics Useful guide for young researchers working towards new

innovations Includes chapters covered by eminent scientists in the field

"In 1983, Dustin Tillman's family--his parents and his aunt and uncle--were murdered in a shocking massacre. His foster brother, Rusty, was convicted of the crime, in a trial that was steeped in the "Satanic Cult" paranoia of the 1980s. Thirty years later, Rusty's conviction is overturned, and suddenly Dustin, now a psychologist, must question whether his testimony that imprisoned his brother was accurate. When one of his patients, an ex-cop, gets him deeply involved in a series of unsolved murders, Dustin's happy suburban life starts to unravel, as his uncertainties about his past and present life begin to merge"--

"This is the most comprehensive account of the internal dynamics of the young intellectual generation of NU advocating for pluralism and democracy within Islam in Indonesia, during Gus Dur's leadership of PBNU. Because of the author's unique vantage point, her sometimes sharp criticism of this movement and its internal dynamics is extremely useful to those who continue to advocate for reform, within NU and in Indonesia generally." - Ahman Suaedy, Executive Director, Wahid Institute, Jakarta "Robin Bush provides an authoritative, insightful and engaging account of the political and intellectual world of Nahdlatul Ulama. She carefully analyses the tumultuous and often tangled dynamics within NU from the 1980s to the post-Soeharto period and unearths deeper historical and cultural resonances in explaining the organisation's outlook and actions. This is a valuable work for anyone seeking to understand contemporary Islamic politics in Indonesia." - Greg Fealy, Fellow and Senior Lecturer in Indonesian Politics, Australian National University, Canberra

The book "Salicylic acid: A Plant Hormone" was first published in 1997 and was praised for its excellent balance of traditional and modern topics. This time, we're building on the success of the prior edition to provide an even more effective second edition. The present book is comprised of 16 chapters highlighting the updated mechanisms of its biosynthesis, physiological role, its action in response to water deficit, relationship of SA with signal transduction, transport of SA and related compounds. Further, the interplay between environmental signals and SA, its impact on transport and distribution of sugars, salicylic acid mediated stress-induced flowering and some aspects of interplay of SA with JA during the establishment of plant resistance to pathogens with different types of nutrition and participation of peroxidases have also been discussed at length. Potential use of SA in food production and its efficiency on post-harvest of perishable crops as well as practical use of SA are also covered. ? ?
