Lombardini Srl was an Italian manufacturer of Diesel engines up to 134HP which is now part of American manufacturer Kohler Co. after acquisition. The company was founded in Reggio Emilia by brothers Adelmo and Rainero Lombardini in 1933 under the name of "Lombardini Fabbrica Italiana Motori S.p.A.". Adelmo Lombardini had already been manufacturing combustion engines since 1922 with a company called "Società Anonima Cooperativa Metallurgica" in Novellara (RE).

This volume constitutes the proceedings of the second symposium on Catalysis and Automotive Pollution Control. CAPoC 2 was a great success from the point of view of its scientific interest, as evidenced by the content of this book, and also from the high participation, some 260 scientists. About two-thirds of the contributors came from the industrial world, mainly the car and oil industries and catalyst manufacturers. This is ample proof that exhaust catalysis remains a major topic of interest. The first part of the book is a general introduction to the problem of automotive pollution. The second, strictly catalytic, part is devoted to fundamental and applied studies on pollution control, with emphasis on exhaust catalytic converters.
