From 20 February 2015 to 31 December 2015, condition surveys were undertaken on 241 vessels. As in previous years, the vessel types predominantly inspected were tankers and dry cargo vessels. This is because of the perceived inherent risk of pollution from tankers and cargo claims relating to hatch-cover issues on dry cargo

vessels. In the offshore sector, the number of condition surveys has fallen on account of the nature of the incidents reported to the Club.
