Employees who give birth on behalf of a surrogate parent and meet the eligibility requirements will be entitled to Maternity Leave and pay as per the Maternity Policy. Throughout this policy, the term 'partner' refers to the child's father or the primary adopter/mother's partner, e.g. spouse, same-sex partner or civil partner, but who is not their relative, i.e. child/sibling, etc.

Commercial surrogacy is criminal under the Human Reproductive Technology Ordinance 2000. The law is phrased in a manner that no one can pay a surrogate, no surrogate can receive money, and no one can arrange a commercial surrogacy (the same applies to the supply of gametes), no matter within or outside Hong Kong.

This book is an essential guide on surrogacy, discussing various legal issues that arise in surrogacy cases. It provides a comprehensive coverage to various issues pertaining to surrogacy arrangements due to failure to meet the needs of those involved in surrogacy, be it the intended parents or the surrogate mother, with special emphasis on the most vulnerable party -- the surrogate child. In the wake of this existing imbalance, the call to reform the practice of surrogacy has also increased. The book provides a comprehensive coverage to various laws and policy regulations in existence dealing with surrogacy, and unravels the latest trends and developments happening around the world as surrogacy gains importance. The international perspectives highlight policies and practices being adopted and followed by various nations with regard to surrogacy regulation and associated parenthood rules. This book also analyses some of the significant cross-border disputes revolving around surrogacy, and explores briefly the jurisprudence of the European Court of Human Rights on matters of parentage and citizenship for children born of trans-national surrogacy with special reference to the prospects of a convention on international surrogacy currently being studied by The Hague Conference on Private International Law. Further, it highlights the issues and questions relating to surrogacy arrangements that are so far unresolved and unanswered and suggests measures for improvements to the existing proposed surrogacy legislation in India and need for uniform international regulation. The book is a great resource for legal practitioners, academics, students, policy-makers, infertility clinics, and charitable organizations working on this issue.

Surrogacy presents particularly complex questions for human rights law and theory. This book provides a unique and insightful examination into the underexplored issues of how domestic and international law is responding to the sharp increase in the use of surrogacy. The work presents critical analysis of the current regulation of surrogacy via domestic law in Australia, India and the USA, and international law in the form of the UN Convention on the Rights of the Child. Including a wide range of views from

academics and practitioners around the world, the contributors consider what could be done to further protect the rights of all persons involved in surrogacy arrangements. This in-depth study of the international and domestic law governing surrogacy provides much needed scholarly knowledge of this contemporary phenomenon, along with recommendations for improvement, regulation and reform. The book will be of great importance to human rights and legal scholars, and well as practitioners in this field.

The last few years have seen a huge increase in the number of reported decisions concerning surrogacy arrangements, single parent adoptions in a surrogacy, or assisted reproduction (AR) context, and private law children disputes in cases with a factual matrix centered on surrogacy or AR. Connected with this trend is the equally large number of reported judgments warning potential parents, lawyers, and clinics of the significant pitfalls and consequences of not following the appropriate legal framework. This specialist title sets out the law, procedure, and policy relating to assisted reproduction and surrogacy in a practical and accessible format, whilst including, where appropriate and with examples, detailed analyses. The book will enable the reader to identify who the parents of a child are when that child is born, who has parental responsibility for that child, and how a person who does not automatically share parental responsibility with the mother can apply for it. It also sets out how legal parenthood can be transferred by agreement from the legal parents at birth to new parents by way of a parental order. The book also uniquely looks at clinics in the UK, and the regulatory framework for them. [Subject: Surrogacy Law, Gender & the Law, Family Law, UK Law]

This book addresses the pressing challenges presented by the proliferation of international surrogacy arrangements. The book is divided into three parts. Part 1 contains National Reports on domestic approaches to surrogacy from Argentina, Australia, Belgium, Brazil, China, Czech Republic, France, Germany, Greece, Guatemala, Hungary, India, Ireland, Israel, Mexico, Netherlands, New Zealand, Russia, South Africa, Spain, Ukraine, United Kingdom, United States and Venezuela. The reports are written by domestic specialists, each demonstrating the difficult and urgent problems arising in many States as a result of international surrogacy arrangements. These National Reports not only provide the backdrop to the authors' proposed model regulation appearing in Part 3, but serve as a key resource for scrutinising the most worrying incompatibilities in national laws on surrogacy. Part 2 of the book contains two contributions that provide international

perspectives on cross-border surrogacy such as the 'human rights' perspective. Part 3 contains a General Report, which consists of an analysis of the National Reports appearing in Part 1, together with a proposed model of regulation of international surrogacy arrangements at the international level written by the two co-editors, Paul Beaumont and Katarina Trimmings. The research undertaken by Katarina Trimmings and Paul Beaumont from 2010 to 2012 was funded by the Nuffield Foundation.

A clinical handbook on gestational surrogacy, with thorough guidance for clinicians involved in global third-party reproductive treatment.

Thanks to recent progress in biotechnology, surrogacy, transplantation of organs and tissues, blood products or stem-cell and gamete banks are now widely used throughout the world. These techniques improve the health and well-being of some human beings using products or functions that come from the body of others. Growth in demand and absence of an appropriate international legal framework have led to the development of a lucrative global trade in which victims are often people living in insecure conditions who have no other ways to survive than to rent or sell part of their body. This growing market, in which parts of the human body are bought and sold with little respect for the human person, displays a kind of dehumanization that looks like a new form of slavery. This book is the result of a collective and multidisciplinary reflection organized by a group of international researchers working in the field of medicine and social sciences. It helps better understand how the emergence of new health industries may contribute to the development of a global medical tourism. It opens new avenues for reflection on technologies that are based on appropriation of parts of the body of others for health purposes, a

type of practice that can be metaphorically compared to cannibalism. Are these the first steps towards a proletariat of men- and women-objects considered as a reservoir of products of human origin needed to improve the health or well-being of the better-off? The book raises the issue of the uncontrolled use of medical advances that can sometimes reach the anticipations of dystopian literature and science fiction.
