Harry Butler, a news editor from the Press Association, was an expert in Teeline shorthand and had written workbooks since the system was first launched for journalists in the 1960s. His passion for such a 'dull' subject was curious, as my friend Jacky Law observed. But Harry was an excellent teacher and turned dictation into a drama; he was a stickler for timing (naturally) and loved a ...

Gold" books - the course book, the workbook and the word list.

This is the companion to the "Teeline Gold Course Book". Linked chapter-by-chapter it provides additional Teeline practice material and longhand transcription to reinforce classroom learning, improve outline and develop speed.

This student book includes an introductory section to outline important principles and theory to give students a firm foundation for learning. It provides a range of practice exercises to offer learners drill materials from 50 WPM to 100 WPM designed especially to build their speed and fluency.

For the most efficient and safest outline, turn to the Teeline Gold Word List. In alphabetical order it contains recommended Teeline outlines for over 12,000 words - the sort of words that might be expected to appear frequently in non-technical material.

This introductory book contains sufficient theory to lay the foundation for higher speeds.

Following on from the "Teeline Gold Course Book", this is intended to develop students' speed. The book should enable teachers to structure their classes, once they have introduced the basic Teeline theory, by reviewing and extending the theory. It also develops the theory of word groupings.

BakerWrite Speed Writing enables people to learn a new system in a matter of hours and become proficient within weeks. This book is laid out in six easy-to-follow lessons that take about an hour each. Practical guided exercises, with full answers, are included in each chapter and each session is rounded off with a dictation passage.

An alternative course book containing all the Teeline theory offering a complete course for students and teachers. it is divided into small learning units with a wide range of examples and exercises at each stage.
