This is a true story of personal greed and downfall, corporate greed fueled with economic and social treachery, shareholder waste and discrimination at AIG, 70 Pine Street in the heart of the financial district. This address is known as the AIG Tower, hence our working title *** TOWER OF THIEVES *** The central character is a man

with a wife, a family, who has cheated his way to the top BY DOING GOOD. What he sees and what he does validates what unchecked power on Wall Street will do to a man and what it has done to an entire company and country. The events at AIG lead right to the CEO and Senior Vice Chairman and how our guy fights an entire corrupt organization and how he became one of those he despised. “We found each other pretty easily - he recognized me from a photo that had appeared in the local paper about the book I was writing about Bear Stearns - and he asked if we could go ‘somewhere more private’ to talk. thought this was ridiculous. A big part of me, in fact. All this cloak-and-dagger nonsense seemed out of place in early summer Nantucket, Massachusetts, of all places. But there was some little sliver inside that told me this could be good. So I went along with it. We went to a park, sat down and, once we'd gotten through the formalities about how the Bear book was going, we got down to business. 'I should tell you that I'm going to federal prison at the end of the year,' he began. I was just listening in disbelief to what he was telling me. This meeting took place long before AIG was the poster child for corporate greed and chutzpah. For that matter, this was before a lot of people had ever even heard of AIG, and even fewer people knew what they did

"Hell is empty, and all the devils are here."
-Shakespeare, The Tempest As soon as the financial crisis erupted, the finger-pointing began. Should the blame fall on Wall Street, Main Street, or Pennsylvania Avenue? On greedy traders, misguided regulators, sleazy subprime companies, cowardly legislators, or clueless home buyers? According to Bethany McLean and Joe Nocera, two of America's most acclaimed business journalists, the real answer is all of the above-and more. Many

devils helped bring hell to the economy. And the full story, in all of its complexity and detail, is like the legend of the blind men and the elephant. Almost everyone has missed the big picture. Almost no one has put all the pieces together. All the Devils Are Here goes back several decades to weave the hidden history of the financial crisis in a way no previous book has done. It explores the motivations of everyone from famous CEOs, cabinet secretaries, and politicians to anonymous lenders, borrowers, analysts, and Wall Street traders. It delves into the powerful American mythology of homeownership.

And it proves that the crisis ultimately wasn't about finance at all; it was about human nature. Among the devils you'll meet in vivid detail: • Angelo Mozilo, the CEO of Countrywide, who dreamed of spreading homeownership to the masses, only to succumb to the peer pressure—and the outsized profits—of the sleaziest subprime lending. • Roland Arnall, a respected philanthropist and diplomat, who made his fortune building Ameriquest, a subprime lending empire that relied on blatantly deceptive lending practices. • Hank Greenberg, who built AIG into a Rube Goldberg contraption with an

undeserved triple-A rating, and who ran it so tightly that he was the only one who knew where all the bodies were buried. • Stan O'Neal of Merrill Lynch, aloof and suspicious, who suffered from "Goldman envy" and drove a proud old firm into the ground by promoting cronies and pushing out his smartest lieutenants. • Lloyd Blankfein, who helped turn Goldman Sachs from a culture that famously put clients first to one that made clients secondary to its own bottom line. • Franklin Raines of Fannie Mae, who (like his predecessors) bullied regulators into submission and let his firm drift away from

its original, noble mission. • Brian Clarkson of Moody's, who aggressively pushed to increase his rating agency's market share and stock price, at the cost of its integrity. • Alan Greenspan, the legendary maestro of the Federal Reserve, who ignored the evidence of a growing housing bubble and turned a blind eye to the lending practices that ultimately brought down Wall Street—and inflicted enormous pain on the country. Just as McLean's *The Smartest Guys in the Room* was hailed as the best Enron book on a crowded shelf, so will *All the Devils Are Here* be remembered for finally making sense of the

meltdown and its consequences.

AMIDST THE WRECKAGE OF FINANCIAL RUIN, PEOPLE ARE LEFT PUZZLING ABOUT HOW IT HAPPENED. WHERE DID ALL THE PROBLEMS BEGIN? For the answer, Jack Cashill, a journalist as shrewd as he is seasoned, looks past the headlines and deep into pages of history and comes back with the goods. From Plato to payday loans, from Aristotle to AIG, from Shakespeare to the Salomon Brothers, from the Medici to Bernie Madoff—in *Popes and Bankers* Jack Cashill unfurls a fascinating story of credit and debt, usury and “the sordid love of

gain.” With a dizzying cast of characters, including church officials, gutter loan sharks, and even the Knights Templar, Cashill traces the creative tension between “pious restraint” and “economic ambition” through the annals of human history and illuminates both the dark corners of our past and the dusty corners of our billfolds.

The economics of skyscraper construction and the real-estate market of Wall Street are explained; also included are illuminating details and anecdotes surrounding each building's history. An essay by Carol Willis,
