The Chomsky-Foucault Debate: On Human Nature by Noam Chomsky

Chomsky's argument for the existence of something called 'human nature' is pretty straightforward and analytic. The environment is too impoverished to account for even the everyday creativity people show in language, which is only one example of human creativity among many (i.e., psychological behaviorism is false).

The Chomsky-Foucault Debate (??)

When you discuss creativity and freedom, I think that one of the misunderstandings, if any misunderstandings have arisen, has to do with the fact that Mr. Chomsky is starting from a limited number of rules with infinite possibilities of application, whereas you, Mr. Foucault, are stressing the inevitability of the "grille" of our historical and psychological determinisms, which also applies to the way in which we discover new ideas.
