Back in 1845, a disease swept across Ireland. It didn't directly affect humans; instead, it hit their crops, and hard. According to History, an organism spread around the country, killing half the potato crop that year and about three-quarters of the produce of the next seven years. It became known as the Great Potato Famine, or The Great Hunger.

How scientists solved the Irish potato famine mystery

Between the years of 1845 and 1849, Ireland, then part of the United Kingdom of Great Britain and Ireland, went through an ordeal of hunger, disease, and emigration that shaped the Ireland we have today. This was an era that nobody has forgotten, and something that is consistently talked about in Irish culture, in museums, or in schools.

Top 10 HORRIFYING facts about the IRISH POTATO FAMINE

During the period of 1845 -51 the Irish population declined with many dying from hunger or disease and others escaping by fleeing Ireland to places such as Britain, Canada and the U.S - known as the great Diaspora of Ireland. Ever since the famine, the Irish population has never climbed to be as high as it was before the famine.

The Great Famine of Ireland 1845 - Irish History

Great Famine, also called Irish Potato Famine, Great Irish Famine, or Famine of 1845-49, famine that occurred in Ireland in 1845-49 when the potato crop failed in successive years. The crop failures were caused by late blight, a disease that destroys both the leaves and the edible roots, or tubers, of the potato plant.
