From the 1980s to the present, mission studies have benefited from the attention of scholars participating in the renaissance of historical studies of American evangelicalism, as well as in the rethinking of the world missionary movement and the American role in it.

A work of immense range and insight, indispensable for all students of history and theology.

Exploring how Christianity became a world religion, this brief history examines Christian missions and their relationship to the current globalization of Christianity. A short and enlightening history of Christian missions: a phenomenon that many say reflects the single most important intercultural movement over a sustained period of human history Offers a thematic overview that takes into account the political, cultural, social, and theological issues Discusses the significance of missions to the globalization of Christianity, and broadens our understanding of Christianity as a multicultural world religion Helps Western audiences understand the meaning of mission as a historical process Contains several new maps that illustrate demographic shifts in world Christianity

A History of Christian Missions traces the expansion of Christianity from its origins in the Middle East to Rome, the rest of Europe and the colonial world, and assesses its position as a major religious force worldwide. Many of the world's religions have not actively sought converts, largely because they have been too regional in character. Buddhism, Islam and Christianity, however, are the three chief exceptions to this, and Christianity in particular has found a home in almost every country in the world. Professor Stephen Neill's comprehensive and authoritative survey examines centuries of missionary activity, beginning with Christ and working through the Crusades and the colonization of Asia and Africa up to the present day, concluding with a shrewd look ahead to what the future may hold for the Christian Church.

The history of Christianity, the growth of the Church, is the history of its missionary efforts, its successes and failures.

This is the first general history of American Catholic mission treating not only its institutions but its human and religious aspects as well. It shows how the church in the United States not only sent thousands of men and women overseas but also evangelized internally, and incorporated millions of immigrants. Angelyn Dries offers a thoroughly researched and nuanced view of this history, and its profound influence on the emergence of a distinctive American Catholic identity. The Missionary Movement in American Catholic History opens with Iberian and French mission efforts on the continent prior to 1776, moves to the situation within the English colonies and the fledgling United States, and then on to mission beyond U.S. borders from 1820. Dries continually places the movement in context, discussing such issues as Nativism, the frontier experience of whites, the fate of Amerindians, the trans-Atlantic slave trade, and the growth of African-American Catholicism. From 1898 to 1980 Dries considers the experiences of the two World Wars, the rapid decolonizations of Africa and Asia, and the U.S.'s increasingly anti-Communist political stance. With the advent of Vatican II, Dries shows, American Catholics entered more deeply into conscious dialogue with their Protestant brothers and sisters, as well as with Jews. By 1980 this "public" dialogue included non-believers and followers of the world religions in a broadening ecumenism. Dries concludes with issues facing the missionary movement beyond 1980, including formation and gender issues, the understanding and practice of mission in the future, and the unfinished agenda of the U.S. Bishops' pastoral, "To the Ends of the Earth." The Missionary Movement in American Catholic History is a remarkably comprehensive work, must-reading for missionaries and church historians.

The World Missionary Conference in 1910 was a defining event in the history of world missions. Brian Stanley here presents

his careful research revealing the compelling story of this turbulent, influential gathering in Edinburgh. This book is both an account of the conference itself and an examination of the Protestant missionary movement as it neared the apex of its size and influence. The World Missionary Conference, Edinburgh 1910 is an erudite and engaging summation of, in Stanley's own words, "the many-sided legacy of the Edinburgh conference, not simply for the history of the ecumenical movement but also for Christian missions and the wider field of Christian discourse on questions of race and culture." --from publisher description.

This work introduces Walls's work and explores its wide-ranging implications for the understanding of history, mission, the formative place of Africa in the Christian story, and the cross-cultural transmission of faith.

This book is a multi-faceted collection of readings focused on the biblical, historical, cultural, and strategic dimensions of the task of world evangelization. The editors have pooled the contributions of over 70 authors to provide laymen and college students with an introduction to the history and potential of the World Christian Movement, a movement of men and women who have responded with courage and conviction to the challenges of this task. - Back cover.

In February 1967, at the height of the Cultural Revolution, the American Society of International Law organized a study panel of legal scholars, social scientists, lawyers, and government officials to consider problems relating to "China and International Order." The panel was founded in the belief that the turmoil in China would not endure and that the People's Republic might soon wish to participate fully in the world community. To prepare for this day, the panel commissioned and reviewed a number of studies of China's interpretation and application of international law. The ten essays in this volume-written by twelve scholars including Mr. Cohen, who has also written a substantial introduction are the fruit of this effort. Four of the essays deal with basic problems relating to Peking's international conduct: recognition and the establishment of diplomatic relations, the regulation of foreign diplomats serving in China, manipulation of the concept of "unequal treaties," and the PRC's conditions for participation in international organizations. The other six essays focus on legal problems that have arisen in China's relations with a given country or international organization.
