The last thing Paisley Peterson needs is to fall in love. She left her high-stress job in Boston so she could heal in Healing Springs--isn't that what the town is about? She needs her sisters. She does not need a man. Asher has always been the one to take care of the people in his life, so when sexy Paisley strolls in and takes the lead, he finds himself turned on by her independence and confidence in a way he has never been turned on before. But after suffering too many

losses in life and with a plate already brimming with family members who need his care and protection, can he handle the truth behind her sudden appearance in Healing Springs? How is he supposed to allow himself to get close to her when he could lose her? Asher and Paisley are from two different worlds with two different life plans. Will their unplanned love affair turn into a dead end? Or will it be just the detour they have both needed all along?

U.S., Canadian and import pick-ups, vans, RVs and 4-wheel drives through 1 ton models. Includes complete coverage of import and domestic mini-vans.

Book 111 of the Saudi Trilogy starts in 1992 on the Persian Gulf in the Eastern Province City of Dammam, Saudi Arabia and then back to the escarpment in Al-Baha city, Baha Province, the tribal home of some 9/11 terrorists. The third book follows on from my years at the Jeddah Military hospital in Book 1 and the Abha years in Book 11. After three years in Baha, I got kicked out and went to walk the South West Coastal path in England, then spent a few months travelling in Asia, South Africa and Australia, I went to Lahore, Pakistan to lick my wounds with a small Director of Nursing job in the Imran Khan hospital. Back to Riyadh Saudi Arabia for two years and then to Aramco, little America, the crème de la crème of nursing jobs. Alas, I didn't stay and ended up in three more DON jobs including the pigeon hell hole in the Desert. I left Saudi for good in 20003 on my sixtieth birthday on Cyprus airways so I could have a scotch. I threw my black bag away forever in the garbage can of the departure lounge

Ford's 351 Cleveland was designed to be a 'mid-sized' V-8 engine, and was developed for higher performance use upon

its launch in late 1969 for the 1970 models. This unique design proved itself under the hood of Ford's Mustang, among other high performance cars. The Cleveland engine addressed the major shortcoming of the Windsor engines that preceded it, namely cylinder head air flow. The Windsor engines just couldn't be built at the time to compete effectively with the strongest GM and Mopar small blocks offerings, and the Cleveland engine was the answer to that problem. Unfortunately, the Cleveland engine was introduced at the end of Detroit's muscle car era, and the engine, in pure Cleveland form, was very short lived. It did continue on as a low compression passenger car and truck engine in the form of the 351M and 400M, which in their day, offered little in the way of excitement. Renewed enthusiasm in this engine has spawned an influx of top-quality new components that make building or modifying these engines affordable. This new book reviews the history and variations of the 351 Cleveland and Ford's related engines, the 351M and 400M. Basic dimensions and specifications of each engine, along with tips for identifying both design differences and casting number(s) are shown. In addition to this, each engine's strong points and areas of concern are described in detail. Written with high performance in mind, both traditional power tricks and methods to increase efficiency of these specific engines are shared. With the influx of aftermarket parts, especially excellent cylinder heads, the 351 Cleveland as well as the 351M and 400M cousins are now seen as great engines to build. This book will walk you through everything you need to know to build a great street or competition engine based in the 351 Cleveland platform.

The General Motors G-Body is one of the manufacturer's most popular chassis, and includes cars such as Chevrolet Malibu, Chevrolet Monte Carlo and El Camino; the Buick

Regal, the Oldsmobile Cutlass Supreme; the Pontiac Grand Prix, and more.

A translation of the Swedish book GENGAS, which describes the conversion of the Swedish motoring fleet and stationary engines to the use of gas generated from wood or charcoal during the Second World War.

"The tools and capabilities available to today's HR professionals provide a unique position that, when used correctly, can lead to that all-important - and highly coveted - role at the leadership table. But how to get there? In this updated second edition, Trehan has distilled all her experience as a global leader into a series of easily digestible chapters designed to help today's HR professional attain and keep a seat at the corporate decision-making table. Trehan offers specific strategies and frameworks for reframing the HR professional's understanding of their role within the company, including viewing the corporation not from the HR fishbowl, but rather from the vantage point of the CEO's office."--Provided by publisher.
