Unit 2: Chemical Reactions Law of Conservation of Mass Antoine Lavoisier - Father of Modern Chemistry Developed the oxygen theory of burning - that all combustion involved a reaction with gaseous oxygen Discovered that while the form or shape of matter could be changed, its mass always stays the same - this is called the Law of Conservation of Mass. Discovered the compound nature of water, which had been thought of as an element. Helped come up with the first systematic chemical nomenclature ...

Unit 2: Chemical Reactions In chemical reactions, atoms rearrange to form one or more different substances. In a chemical change, the properties that give a substance its identity change.

are not lost or gained. Chemical reactions can be represented using equations. Catalysts speed up reactions without being used up.

Chemical reactions - Types of reaction - KS3 Chemistry ...

During unit 2, we learned all about chemical reactions and some of the different types commonly occurring around us. A chemical reaction is the evidence of a chemical change in which atoms are rearranged. Some chemical reactions we talked about in class are synthesis, decomposition, single displacement, double displacement, incomplete and complete combustion, and neutralization.

Chapter 5: Unit 2. Classification of Reactions.

Classifications of Reactions. Chemical reactions can be broadly classified in five categories. 1)

Decomposition reaction: When one reactant breaks down to two more reactant, the reaction is called decomposition reaction.

Activity 1: Chemical Reactions (Unit 2.7.1 Handout 1)

Time: 35- 40 minutes 1) Hand out Unit 2.7.1 Handout 1 to students. 2) Discuss with students that when reading, they should pay close attention to what all of the passage is about. This passage has a connection to ideas and information about chemical reactions.

Lesson 2.7.1: Physical Science Chemical Reactions Part 2

Unit 2 Molecular interactions and reactions The types of bonding are described in greater detail and the factors that influence the rates of chemical reactions. Students will perform calculations to determine concentrations and volumes of solutions in chemical reactions as well as investigate the unique properties of water, acids and bases.
