...it is time to seriously consider the reality of intelligent technology, many forms of which are already being integrated into our daily lives. In that spirit, John Brockman, publisher of Edge.org, asked the world 's most influential scientists, philosophers, and artists one of today 's most consequential questions: What do you think about machines that think?

What to Think About Machines That Think — Douglas Coupland

Perhaps the most disturbing view of all is that the biggest threat we face is not from ever more intelligent machines, but rather from the increasing extent to which we are passing control of so many aspects of our lives to computerized systems. The financial crash of 2008 was one of many symptoms of this abrogation of human control.

What to Think About Machines That Think: Leading Thinkers ...

Frustrated, he constantly abuses machines and starts to think they are conspiring against him. The people he tells about this write him off as paranoid, but eventually every machine in his house (including his car) turns on him. We learn from him his views about why the radio doesn't work and why his clock chimes more than the hour.

A Thing About Machines - Wikipedia

It 's a fictional modification of the Turing Test, first proposed (as the Imitation Game) by British mathematician Alan Turing in 1950 to study the question of whether machines can " think ". The best way, Turing suggested, would be to interrogate the machine as if it were human and observe how it behaved.
