Wheel and Pinion Cutting in Horology: A Historical and ...

Antique clock wheel and pinion cutting. For years we have used outworkers to cut wheels and pinions for clocks that we were restoring or rebuilding. The main reason for this was commercial, the cost of the equipment in relation to how much we would actually use it. We were also limited for space in the workshop. In 2018 we decided to invest in the equipment ourselves.

Antique Clock Wheel and Pinion Cutting - Antique Clock ...

cutting of wheels & pinions. We have some of the best machines available to carry out accurate & precise work. Some of the clocks covered are, longcase, Bracket, Carriage, Skeleton & Chronometer. For many years we have been involved in supplying clock parts and brass castings for the restoration of antique clocks, including English Longcases, Fusee, French, European and American. Some of the fields we specialize in are making brass or steel clock hands, Gear cutting for instruments and wheel and pinion cutting for clocks. Brass clock dial making and restoration, Complete or part movement restoration, Prototype making for industry, and complete clock movement making.

Richards of Burton Home Page - Clock

In the foreground the bars are fed through and the multiple tools either side of the collet in the centre then cut the material. The same process as is used in the previous section on profile turning. These machines can produce the blanks for wheels and pinions which are then cut later in other machines as well as pins, screws, canons etc.
