The Second World War is often seen as a period of emancipation, because of the influx of women into paid work, and because the state took steps to relieve women of domestic work. This study challenges such a picture. The state approached the removal of women from the domestic sphere with extreme caution, in spite of the desperate need for women's labour in war work. Women's own preferences were frequently neglected or distorted in the search for a compromise between production and patriarchy. However, the enduring practices of paying women less and treating them as an inferior category of workers led to growth in the numbers and proportions of women employed after the war in many areas of work. Penny Summerfield concludes that the war accelerated the segregation of women in 'inferior' sectors of work, and inflated the expectation that working women would bear the double burden without a redistribution of responsibility for the domestic sphere between men, women and the state. First published in 1984, this is an important book for students of history, sociology and women's studies at all levels.

In a thrilling feminist fantasy epic, a revolutionary spell gives women the ability to control their own fertility—with consequences that rock their patriarchal society to its core. When a nobleman's first duty is to produce a male heir, women have always been treated like possessions and bargaining chips. But now, as the aftereffects of this world-altering spell ripple out, women at last have a bargaining chip of their own. Alys is the widowed mother of two teenage children, and the disinherited daughter of a king. Her existence has been carefully proscribed, but now she discovers a fierce talent not only for politics, but also for magic. Meanwhile, in a neighboring kingdom, young Ellin finds herself unexpectedly on the throne after the sudden death of everyone who stood before her in the line of succession. Conventional wisdom holds that she will marry quickly, then surrender the throne to her new husband...only Ellin has other ideas. The tensions tearing at both kingdoms become abruptly worse when a caravan of exiled women and their escort of disgraced soldiers stumble upon a new source of magic in what was once uninhabitable desert. This new and revolutionary magic—which only women can wield—threatens to tear down what is left of the patriarchy. And the men who currently hold power would do anything to destroy it.
